## **Abstract**

**If you don't understand artificial intelligence, ask yourself if I am right because others don't understand it either.**

*There is no generally applicable definition of artificial intelligence.*

The field is so vast that its actors will always have to develop a more precise definition of their own objectives in their context.

Artificial intelligence is broadly defined as the simulation of human intelligence by machines programmed to learn, reason, and solve problems.

Therefore, AI encompasses several subfields, including machine learning (ML), deep learning (DL), robots, natural language processing (NLP), and computer vision, etc., each with distinct applications and limitations.

And yet, AI can be classified into two main categories:

i- Narrowly defined AI (concrete definition of AI)

Which is simply defined as an automated algorithm operating on the basis of statistical transition matrices, which allows it to increase the amount of existing information.

ii- General AI (broad definition of AI):

such as machine learning (ML), deep AI (DAI), image and voice recognition, etc.

**Advances and Trends in Artificial Intelligence. Theory and Practices in Artificial Intelligence** Hamido Fujita, Philippe Fournier-Viger, Moonis Ali, Yinglin Wang, 2022-08-29 This book constitutes the thoroughly refereed proceedings of the 35th International Conference on Industrial Engineering and Other Applications of Applied Intelligent Systems IEA AIE 2022 held in Kitakyushu Japan in July 2022 The 67 full papers and 11 short papers presented were carefully reviewed and selected from 127 submissions The IEA AIE 2022 conference focuses on focuses on applications of applied intelligent systems to solve real life problems in all areas including business and finance science engineering industry cyberspace bioinformatics automation robotics medicine and biomedicine and human machine interactions Trends in Artificial Intelligence Theory and Applications. Artificial Intelligence Practices Hamido Fujita, Philippe Fournier-Viger, Moonis Ali, Jun Sasaki, 2020-09-04 This book constitutes the thoroughly refereed proceedings of the 33rd International Conference on Industrial Engineering and Other Applications of Applied Intelligent Systems IEA AIE 2020 held in Kitakyushu Japan in September 2020 The 62 full papers and 17 short papers presented were carefully reviewed and selected from 119 submissions The IEA AIE 2020 conference will continue the tradition of emphasizing on applications of applied intelligent systems to solve real life problems in all areas These areas include are language processing robotics and drones knowledge based systems innovative applications of intelligent systems industrial applications networking applications social network analysis financial applications and blockchain medical and health related applications anomaly detection and automated diagnosis decision support and agent based systems multimedia applications machine learning data management and data clustering pattern mining system control classification and fault diagnosis **Artificial Intelligence Theory, Models, and Applications** P Kaliraj, T. Devi, 2021-10-21 This book examines the fundamentals and technologies of Artificial Intelligence AI and describes their tools challenges and issues It also explains relevant theory as well as industrial applications in various domains such as healthcare economics education product development agriculture human resource management environmental management and marketing The book is a boon to students software developers teachers members of boards of studies and researchers who need a reference resource on artificial intelligence and its applications and is primarily intended for use in courses offered by higher education institutions that strive to equip their graduates with Industry 4 0 skills FEATURES Gender disparity in the enterprises involved in the development of AI based software development as well as solutions to eradicate such gender bias in the AI world A general framework for AI in environmental management smart farming e waste management and smart energy optimization The potential and application of AI in medical imaging as well as the challenges of AI in precision medicine AI s role in the diagnosis of various diseases such as cancer and diabetes The role of machine learning models in product development and statistically monitoring product quality Machine learning to make robust and effective economic policy decisions Machine learning and data mining approaches to provide better video

indexing mechanisms resulting in better searchable results ABOUT THE EDITORS Prof Dr P Kaliraj is Vice Chancellor at Bharathiar University Coimbatore India Prof Dr T Devi is Professor and Head of the Department of Computer Applications Bharathiar University Coimbatore India     **Artificial Intelligence** Thomas L. Dean,James Allen,John Aloimonos,1995 This book provides a detailed understanding of the broad issues in artificial intelligence and a survey of current AI technology The author delivers broad coverage of innovative representational techniques including neural networks image processing and probabilistic reasoning alongside the traditional methods of symbolic reasoning The work is intended for students in artificial intelligence researchers and LISP programmers     **Artificial Intelligence: Theory and Practice** Thomas Dean,1994-12-01

Artificial Intelligence and Machine Learning Lyla B. Das,Sudhish N. George,Anup Aprem,2023-06-06 This book is designed for undergraduates postgraduates and professionals who want to have a firm grip on the fundamental principles of AI and ML Artificial Intelligence AI is a broad area of knowledge which has percolated into every aspect of human life Machine Learning algorithms are considered to be a subset of AI Theory mathematics and coding are three aspects to any topic in AI This book covers the most relevant topics in the field of Artificial Intelligence and Machine Learning ML The subdivisions of Machine Learning are Supervised Unsupervised and Reinforcement learning All three are covered in sufficient depth One very important and upcoming field of application is Natural Language Processing NLP A whole section of the book has been devoted to this The book covers the conceptual mathematical and numerical analysis of the important ML algorithms and their practical applications The topics covered include AI search algorithms Classical machine learning Deep learning theory and popular networks Natural Language Processing NLP and Reinforcement learning Numerical examples and lucid explanations give the reader an easy entry into the world of AI and ML     **Artificial Intelligence** Robert J. Schalkoff,1990     Automated Planning Malik Ghallab,Dana Nau,Paolo Traverso,2004-05-21 Automated planning technology now plays a significant role in a variety of demanding applications ranging from controlling space vehicles and robots to playing the game of bridge These real world applications create new opportunities for synergy between theory and practice observing what works well in practice leads to better theories of planning and better theories lead to better performance of practical applications Automated Planning mirrors this dialogue by offering a comprehensive up to date resource on both the theory and practice of automated planning The book goes well beyond classical planning to include temporal planning resource scheduling planning under uncertainty and modern techniques for plan generation such as task decomposition propositional satisfiability constraint satisfaction and model checking The authors combine over 30 years experience in planning research and development to offer an invaluable text to researchers professionals and graduate students Provides a thorough understanding of AI planning theory and practice and how they relate to each other Covers all the contemporary topics of planning as well as important practical applications of planning such as model checking and game playing Presents case studies and applications in planning engineering space robotics CAD CAM process control emergency

operations and games Provides lecture notes examples of programming assignments pointers to downloadable planning systems and related information online

*The Artificial Intelligence Compendium*, 1988 Reimagining Literacy in the Age of AI Jason D. DeHart, Suriati Abas, Raúl Alberto Mora, Damiana Gibbons Pyles, 2025-04-17 This volume assesses the critical intersection of artificial intelligence AI and literacy education Drawing on the concept of living literacies it explores the transformative potential of AI in literacy practices offering a comprehensive narrative that bridges theoretical frameworks with practical applications The book goes beyond the conventional understanding of AI literacy as mere technological proficiency Instead it positions AI as a catalyst for expansive inclusive and multifaceted literacy practices in the digital age Scholars from different parts of the world examine how AI is not just changing what we read and write but how we think create and express ourselves in a post human context

**KEY FEATURES** Explores AI literacy that encompasses critical thinking ethical reasoning and creative expression Offers insights into the role of educators and researchers in cultivating AI literacy among learners Discusses how creativity and identity intertwine with AI literacy Suggests practical approaches to integrating AI into classroom instruction across different age groups This timely work serves as an essential guide for educators researchers and learners by navigating the evolving terrain of literacy in a world increasingly augmented by AI
