Draw the hierarchy chart and design the logic for a program that calculates service charges for Hazel's Housecleaning service. The program contains housekeeping, detail loop, and end-of-job modules. The main program declares any needed global variables and constants and calls the other modules. The housekeeping module displays a prompt for and accepts a customer's last name. While the user does not enter ZZZZ for the name, the detail loop accepts the number of bathrooms and the number of other rooms to be cleaned. The service charge is computed as \$40 plus \$15 for each bathroom and \$10 for each of the other rooms. The detail loop also displays the service charge and then prompts the user for the next customer's name. The end-of-job module, which executes after the user enters the sentinel value for the name, displays a message that indicates the program is complete.

**Evolutionary Machine Design** Nadia Nedjah,Luiza de Macedo Mourelle,2005 In recent years genetic programming has attracted many researcher s attention and so became a consolidated methodology to automatically create new competitive computer programs Concise and efficient synthesis of a variety of systems has been generated by evolutionary computations Evolvable hardware is a growing discipline It allows one to evolve creative and novel hardware architectures given the expected input output behaviour There are two kinds of evolvable

hardware extrinsic and intrinsic The former relies on a simulated evolutionary process to evaluate the characteristics of the evolved designs while the latter uses hardware itself to do so Usually reconfigurable hardware such as FPGA and FPAAs are exploited One of the main problems that still faces researchers in the field of evolutionary machine design is the scalability This book is devoted to reporting innovative and significant progress in automatic machine design Theoretical as well as practical chapters are contemplated The scalability problem in evolutionary machine designs is addressed The content of this book is divided into two main parts evolvable hardware and genetic programming and evolutionary designs In the following we give a brief description of the main contribution of each of the included chapters
