Rewilding in Practice Ian Convery, Steve Carver, Monica T. Engel, Sally Hawkins, Rene Beyers, Yue Cao, 2025-03-03
Rewilding is a long term and large scale process which works to restore degraded ecosystems or social ecological systems to the point that they are resilient and self sustaining and therefore requiring little in terms of conservation management Rewilding practice focuses on re establishing ecological processes including trophic levels that were lost mainly due to anthropogenic disturbance It also aims to affect a paradigm shift in human nature relationships with intentions to better understand the interdependencies between humans and nature so that people can appreciate and accommodate nature in their landscapes and make more informed and sustainable decisions about how we live In this sense rewilding has real transformational potential The Bent of Tau Beta Pi ,2007 The Impact of Climate Change Carolyn Fry, 2008 World leaders environmentalists and the international science community agree that climate change is one of the largest and most intractable problems now confronting us all Despite this it still remains a bewildering subject The Impact of Climate Change tries to answer our urgent questions 1 What is climate change 2 How will it affect us 3 What can we do to stop it The book is divided into five chapters which look at why our climate is changing how the world works how we predict the outcomes of climate change how we live with change and how we make a difference It looks at environmental cultural and technological changes likely to occur in the 21st century and beyond It takes scientific findings and demystifies them it illuminates our planet s greatest threat in a dynamic and entertaining manner without being dogmatic or judgmental The Impact of Climate Change empowers the reader by providing information on solutions and opportunities to reduce the impact of climate change
