to studying microbial diversity and life in extreme environments bioenergetics microbial metabolic capabilities and major

[blackwellpublishing.com konhauser](http://www.blackwellpublishing.com/konhauser) Science Fact and Science Fiction Brian Stableford,2006-09-06 Science fiction is a
literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to
create valid narratives that explore the future effects of science on events and human beings Science Fact and Science
Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has
influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present
focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and
technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations
for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a
catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences
including how fictional representations of science affect how we view its practice and disciplines Although the main focus is
on literature other forms of science fiction including film and video games are explored and because science is an
international matter works from non English speaking countries are discussed as needed Catalog of Copyright Entries.
