Real Food, Real Facts Charlotte Biltekoff, 2024-08-27 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit www.luminosoa.org to learn more In recent decades many members of the public have come to see processed food as a problem that needs to be solved by eating real food and reforming the food system But for many food industry professionals the problem is not processed food or the food system itself but misperceptions and irrational fears caused by the public's lack of scientific understanding In her highly original book Charlotte Biltekoff explores the role that science and scientific authority play in food industry responses to consumer concerns about what we eat and how it is made As Biltekoff documents industry efforts to correct public misperceptions through science based education have consistently misunderstood the public's concerns which she argues are an expression of politics This has entrenched food scientism in public discourse and seeded a form of antipolitics with broad consequences *Real Food Real Facts* offers lessons that extend well beyond food choice and will appeal to readers interested in how everyday people come to accept or reject scientific authority in matters of personal health and well being

Food, Philosophy, and Intellectual Property Enrico Bonadio, Andrea Borghini, 2024-05-08 This is a book about food philosophy and intellectual property rights Taken separately these are three well known subjects but it is uncommon to consider them together The book comprises 50 case studies organized around eight themes images genericity and descriptiveness language traps procedures menus recipes and creativity boundaries biotech and empowerment The introductory chapter frames the selection of cases and encourages readers to look beyond them envisaging new lenses to look at food vis vis intellectual property The terrain encompassed is wide ranging and reaches out to fine grained aspects of food products recipes and cooking Conceived for a wide scope of readers the volume ultimately interrogates the links between food and cultural identity bringing to the fore the ethical political and aesthetic worth of culinary arts and gastronomic experiences This accessible book will be of value to scholars students practitioners and others with interests in the areas of intellectual property food law and food studies

Tech to Table Richard Munson, 2021-09-23 Imagine eating a burger grown in a laboratory a strawberry picked by a robot or a pastry created with a 3 D printer You would never taste the difference but these technologies might just save your health and the planet's Today landmark advances in computing engineering and medicine are driving solutions to the biggest problems created by industrialized food *Tech to Table* introduces readers to twenty five of the most creative entrepreneurs advancing these solutions They come from various places and professions identities and backgrounds But they share an outsider's perspective and an idealistic sometimes aggressive ambition to rethink the food system Reinvention is desperately needed Under Big Ag pollution climate change animal cruelty hunger and obesity have festered and despite decades of effort organic farming accounts for less than one percent of US croplands Entrepreneurs represent a new path one where disruptive technology helps people and the environment These innovations

include supplements to lower the methane in cattle belches drones that monitor irrigation levels in crops urban warehouses that grow produce year round and more The pace and breadth of change is astonishing as investors pump billions of dollars into ag innovation Startups are attracting capital and building markets with the potential to upend conventional agribusiness s stranglehold on the food system Not every invention will prosper long term but each marks a fundamental change in our approach to feeding a growing population sustainably A revolution in how we grow and eat food is brewing Munson s deftly crafted profiles offer a fascinating preview of the coming future of food
