Ageing Research -

Methodological Issues Carmen García-Peña,Luis Miguel Gutiérrez-Robledo,Mario Ulises Pérez-Zepeda,2018-09-25 This is the second edition of a well received book that reviews classical epidemiological and clinical research designs with a specific focus on aging Chapters cover basic topics like the scientific method ethics and the consequences of certain exclusion criteria The work also includes a look at clinical concepts like multimorbidity frailty and functionality New material includes chapters such as geroscience health systems research big data and data mining financing and future of aging research The authors reveal the issues and challenges for researchers of age and aging and also consider from basic to clinical and from clinical to public policies of social and health care The focus on aging is what gives this book its valuable perspective on research methodology All authors have considerable experience in aging geriatrics or gerontology and each chapter includes both a theoretical framework and practical examples of studies in aging Readers will discover study designs that are reviewed for basic structure main flaws and advantages and are analyzed for specific conditions and variables regarding aging This text is suited to both health care professionals caring for older adults and researchers who are new to research in aging It is relevant across the disciplines including medicine psychology social sciences and dentistry and it supports

learning with graphs and figures **Innovative Systems for Intelligent Health Informatics** Faisal Saeed, Fathey Mohammed, Abdulaziz Al-Nahari, 2021-05-05 This book presents the papers included in the proceedings of the 5th International Conference of Reliable Information and Communication Technology 2020 IRICT 2020 that was held virtually on December 21-22, 2020. The main theme of the book is Innovative Systems for Intelligent Health Informatics. A total of 140 papers were submitted to the conference but only 111 papers were published in this book. The book presents several hot research topics which include health informatics, bioinformatics, information retrieval, artificial intelligence, soft computing, data science, big data analytics, Internet of things (IoT), intelligent communication systems, information security, information systems, and software engineering. *Paperbound Books in Print*, 1991 The University of Idaho Bulletin University of Idaho, 1942 **Oncology Informatics** Bradford W. Hesse, David Ahern, Ellen Beckjord, 2016-03-17 Oncology Informatics: Using Health Information Technology to Improve Processes and Outcomes in Cancer Care encapsulates National Cancer Institute collected evidence into a format that is optimally useful for hospital planners, physicians, researchers, and informaticians alike as they collectively strive to accelerate progress against cancer using informatics tools. This book is a formational guide for turning clinical systems into engines of discovery as well as a translational guide for moving evidence into practice. It meets recommendations from the National Academies of Science to reorient the research portfolio toward providing greater cognitive support for physicians, patients, and their caregivers to improve patient outcomes. Data from systems studies have suggested that oncology and primary care systems are prone to errors of omission which can lead to fatal consequences downstream. By infusing the best science across disciplines, this book creates new environments of Smart and Connected Health. Oncology Informatics is also a policy guide in an era of extensive reform in healthcare settings including new incentives for healthcare providers to demonstrate meaningful use of these technologies to improve system safety, engage patients, ensure continuity of care, enable population health, and protect privacy. Oncology Informatics acknowledges this extraordinary turn of events and offers practical guidance for meeting meaningful use requirements in the service of improved cancer care. Anyone who wishes to take full advantage of the health information revolution in oncology to accelerate successes against cancer will find the information in this book valuable. Presents a pragmatic perspective for practitioners and allied health care professionals on how to implement Health IT solutions in a way that will minimize disruption while optimizing practice goals. Proposes evidence-based guidelines for designers on how to create system interfaces that are easy to use, efficacious, and timesaving. Offers insight for researchers into the ways in which informatics tools in oncology can be utilized to shorten the distance between discovery and practice.
