experts who work with time series as well as any researchers working in the area of dynamic models Key Features It covers basics of forecasting It discusses ETS and ARIMA models It has chapters on extensions of ETS and ARIMA including how to use explanatory variables and how to capture multiple frequencies It discusses intermittent demand and scale models for ETS ARIMA and regression It covers diagnostics tools for ADAM and how to produce forecasts with it It does all of that with examples in R *Statistics for Economics*, 2012 Co-Branding: Fit Factors Between Partner Brands Peter

Zickermann, 2014-09 Firms are continuously looking for new opportunities to exploit and leverage their existing brands to achieve business growth In the past companies have leveraged their most important asset brands through brand and line extensions Nowadays the most recent trend for capitalizing on brands is called Co Branding in which two or more brands are presented jointly to the consumer forming a new product or service offering This new branding strategy promises many benefits especially for companies operating internationally with strong global brands This study is about the perception of fit between two partner brands in a co branding venture Previous studies have already identified that a perceived fit between partner brands leads to a positive evaluation of the co branded offering by consumers But why are some brands perceived as fitting together by consumers and others are not To answer this question this study investigates which factors e g similar price level target group product category lead to a perceived fit between partner brands by consumers *Statistics for Business and Economics, Student Value Edition (Unbound)* Paul Newbold, William Carlson, Betty Thorne, 2008-08-05
