Operation Management Case Study Assignment Help Case:

Cases in Operations Management K. N. KRISHNASWAMY, M. MATHIRAJAN, 2008-08-18 This book is intended to enhance the knowledge of MBA students in Operations Management acquired in a basic level course. The case study material covered relates to a wide spectrum of management activities and deals with the application of statistical operations research and system analysis methods to problems categorized under several headings. The book can therefore be used in conjunction with a course in Operations Management or as an independent second course. Thirty one real world cases in the book are the result of several years of research work by the authors including consultancy assignments, doctoral dissertations and project assignments of graduate management students. The cases are research oriented and encourage students to think rigorously in an environment of uncertainty of a real world situation. The cases are comprehensive enough to drill students in devising alternative methods of solutions and arm them with a deep understanding of decision making processes instead of merely providing them with a general appreciation of managerial perspective. These realistic cases help in learning applications of quantitative and analytical techniques of management bringing home to the student the challenges of managing activities throughout the organization. Though a new title it is an enlarged version of Dr Krishnaswamy's earlier book *Cases in Production Operations Management*.

Strategic Operations Management David Walters, Mark Rainbird, 2017-09-16 The value chain framework has made its way to the forefront of management thought as a powerful analysis tool for strategic planning. Its ultimate goal is to maximize value creation while minimizing costs. In this book David Walters applies the framework to strategic decision making in the field of operations management.

International Operations Management Professor Alberto F De Toni, 2012-08-28 *International Operations Management: Lessons in Global Business* uses a fascinating selection of case studies researched during the International Operations Management Project sponsored by the European Commission to produce a valuable view of businesses in Western and Eastern traditions. Ranging from China Post and Flextronics International Singapore to Electrolux Ford and GlaxoSmithKline the studies link conceptual and practical approaches in five areas: international operations management, strategy, sourcing and manufacturing, new product development, logistics and networked organisations. Throughout the authors compare the Western and Eastern approaches to business and introduce theory to clarify the comparison and the real consequences of internationalisation. With its balance of theoretical and applied content, this volume created from an exciting collaboration between universities and schools of management in Europe and China serves as both a primary and supplementary source for higher level students and educators and as a worthwhile read for interested practitioners.
