Discourse Perspectives on Second And/or Foreign Language Teaching and Learning Dogan Yuksel, Banu Inan, 2013

Discourse can be understood as the sum of linguistic usages and metalinguistic manners about a social practice. It examines language in use with the help of the tools that would enable us to get a deeper understanding of what is said or unsaid. Analysis of discourse would help us understand social, cultural, psychological, and academic dynamics that are interwoven in the utterances of interlocutors as they use language. This book covers a range of theoretical and applied studies on the examination of discourse in various second and foreign languages learning and teaching contexts. Basically, it includes studies that specifically focus on different aspects of discourse in the teaching of all four skills: reading, writing, listening, and speaking. Three theoretical chapters on conducting discourse analysis research, the use of corpus linguistics, and historical review of discourse analysis perspectives enrich the scope and content of the book. Researchers from different teaching and learning settings, including Turkey, China, and the USA, contributed to this volume. The target audience of the book are undergraduate and graduate students in different foreign and second language departments and teachers, researchers, and academicians of foreign and second languages.

Discourse Perspectives on Second and/or Foreign Language Teaching and Learning will facilitate the understanding of discourse by portraying empirical and theoretical studies on discourse. It covers quite different perspectives, e.g. sociocultural theory of mind perspective, critical discourse analysis, and psychological and/or mainstream perspectives of various topics in discourse, e.g. classroom interaction, written discourse, corpus linguistics, oral interviews, discourse of blogs, technology and discourse, etc. The first three chapters provide a review of discourse and how it is conceptualised to various target groups of people, e.g. graduate students, teachers, researchers, and academicians, assuming no prior knowledge. The other chapters focus on different aspects of discourse both in and outside the classroom. This book provides teachers, learners, and researchers of second and/or foreign languages with the tools to analyse and/or examine language inside and outside their classrooms.

Spoken and Written Discourse in Online Interactions Maria Grazia Sindoni, 2014-04-24

Winner of the AIA Book Prize for a research monograph in the field of English Language and Linguistics 2016. Common patterns of interactions are altered in the digital world and new patterns of communication have emerged, challenging previous notions of what communication actually is in the contemporary age. Online configurations of interaction, such as video chats, blogging, and social networking practices, demand profound rethinking of the categories of linguistic analysis given the blurring of traditional distinctions between oral and written discourse in digital texts. This volume reconsiders underlying linguistic and semiotic frameworks of analysis of spoken and written discourse in the light of the new paradigms of online communication, in keeping with a multimodal corpus linguistics theoretical framework. Typical modes of online interaction encompass speech, writing, gesture, movement, gaze, and social distance. This is nothing new, but here Sindoni asserts that all these modes are integrated in unprecedented ways, enacting new interactional patterns and new systems of interpretation among web users. These non-verbal modes have been sidelined.

by mainstream linguistics whereas accounting for the complexity of new genres and making sense of their educational impact is high on this volume's agenda. Sindoni analyzes other new phenomena ranging from the intimate sphere i.e. video chats, personal blogs or journals on social networking websites to the public arena i.e. global scale transmission of information and knowledge in public blogs or media sharing communities, shedding light on the rapidly changing global web scenario.

Corpora and Discourse Annelie Adel, Randi Reppen, 2008-06-26 This book brings together contributions from a diverse collection of scholars who explore different ways of combining corpus linguistics and discourse analysis, studying discourse at the prosodic, lexical and textual levels. Both spoken and written discourse are investigated in a variety of settings including academia, the workplace, news and entertainment. Not only does the volume offer a rich sample of English language discourse from around the world, including international learner and non-standard varieties of English, but it also covers a range of topics and methods. This book will be of particular interest to researchers and students specializing in discourse studies.
