Riviuccio,1999 Static and Free Vibration Analyses of Composite Shells Based on Different Shell Theories ,2011 Equations of motion with required boundary conditions for doubly curved deep and thick composite shells are shown using two formulations The first is based upon the formulation that was presented initially by Rath and Das 1973 J Sound and Vib and followed by Reddy 1984 J Engng Mech ASCE In this formulation plate stiffness parameters are used for thick shells which reduced the equations to those applicable for shallow shells This formulation is widely used but its accuracy has not been completely tested The second formulation is based upon that of Qatu 1995 Compos Press Vessl Indust 1999 Int J Solids Struct In this formulation the stiffness parameters are calculated by using exact integration of the stress resultant equations In addition Qatu considered the radius of twist in his formulation In both formulations first order polynomials for in plane displacements in the z direction are utilized allowing for the inclusion of shear deformation and rotary inertia effects first order shear deformation theory or FSDT Also FSDTQ has been modified in this dissertation using the radii of each laminate instead of using the radii of mid plane in the moment of inertias and stress resultants equations Exact static and free vibration solutions for isotropic and symmetric and anti symmetric cross ply cylindrical shells for different length to thickness and length to radius ratios are obtained using the above theories Finally the equations of motion are put together with the equations of stress resultants to arrive at a system of seventeen first order differential equations These equations are solved numerically with the aid of General Differential Quadrature GDQ method for isotropic cross ply angleply and general lay up cylindrical shells with different boundary conditions using the above mentioned theories Results obtained using all three theories FSDT FSDTQ and modified FSDTQ are compared with the results available in literature and those obtained using a three dimensional 3D analysis The latter 3D is used here mainly to test the accuracy of the shell theories presented here *Vibration Simulation Using MATLAB and ANSYS* Michael R. Hatch,2000-09-21 Transfer function form zpk state space modal and state space modal forms For someone learning dynamics for the first time or for engineers who use the tools

infrequently the options available for constructing and representing dynamic mechanical models can be daunting It is important to find a way to put them all in perspective and have them available for quick reference It is also important to have a strong understanding of modal analysis from which the total response of a system can be constructed Finally it helps to know how to take the results of large dynamic finite element models and build small MATLAB state space models Vibration Simulation Using MATLAB and ANSYS answers all those needs Using a three degree of freedom DOF system as a unifying theme it presents all the methods in one book Each chapter provides the background theory to support its example and each chapter contains both a closed form solution to the problem shown in its entirety and detailed MATLAB code for solving the problem Bridging the gap between introductory vibration courses and the techniques used in actual practice Vibration Simulation Using MATLAB and ANSYS builds the foundation that allows you to simulate your own real life problems Features Demonstrates how to solve real problems covering the vibration of systems from single DOF to finite element models with thousands of DOF Illustrates the differences and similarities between different models by tracking a single example throughout the book Includes the complete closed form solution and the MATLAB code used to solve each problem Shows explicitly how to take the results of a realistic ANSYS finite element model and develop a small MATLAB state space model Provides a solid grounding in how individual modes of vibration combine for overall system response
