The "Minnesota Code" for ECG classification ,1967

ECG Signal Processing, Classification and Interpretation Adam Gacek,Witold Pedrycz,2011-09-18 The book shows how

the various paradigms of computational intelligence employed either singly or in combination can produce an effective structure for obtaining often vital information from ECG signals. The text is self-contained, addressing concepts, methodology, algorithms, and case studies and applications, providing the reader with the necessary background augmented with step-by-step explanation of the more advanced concepts. It is structured in three parts: Part I covers the fundamental ideas of computational intelligence together with the relevant principles of data acquisition, morphology, and use in diagnosis; Part II deals with techniques and models of computational intelligence that are suitable for signal processing; and Part III details ECG system diagnostic interpretation and knowledge acquisition architectures. Illustrative material includes brief numerical experiments, detailed schemes, exercises, and more advanced problems.
