Building the Cape Verde Islands Ricardo A. S. Ramalho, 2011-04-30 Hotspots are enigmatic surface features that are not easily explained in the framework of plate tectonics Investigating their origin is the goal of this thesis using field evidence collected in the Cape Verde Islands a prominent hotspot archipelago in the eastern Atlantic Ocean The approach taken is to document uplift of the islands relative to sea level and use the uplift features to test various models of hotspot development Island uplift is thought to arise from the growth of the anomalously shallow seafloor on which the islands rest known as the bathymetric swell which is characteristic of hotspots The work comprises a geological summary and detailed mapping of paleo sea level markers on Cape Verde Isotopic dating of the markers shows that uplift on the islands over the last 6 Myr is up to 400 m and that the uplift chronology varies among islands Two processes act to raise the Cape Verde Islands The dominant process is one that is local to individual islands The regional swell related component is smaller and possibly episodic The observations provide strong constraints on swell development and on hotspot models

Reconsidering Colonial Heritage in West African Cities Krzysztof Górny, 2023-12-12 The material heritage of the colonial era is built into Africa's cities from their urban layouts to their architecture monuments and street names This book discusses the varying responses to colonial heritage in West African cities with a particular focus on the case studies of Praia in Cape Verde Dakar in Senegal and Banjul in The Gambia Europeans tended to focus on cities as centres of administration and they were often both the starting points for settlement and the locations in which power was formally handed over to new African governments Colonialism in Praia Dakar and Banjul was abolished at different times under different colonial powers Portuguese French and British and amongst vastly different conditions of unrest Based on extensive original research this book demonstrates that the contemporary approach to the contentious issue of urban colonial heritage is often determined by metropolis colony relationship before decolonisation postcolonial diplomatic relations as well as present day political decisions The book uncovers a rich relationship between politics and urban space and between new and old Combining insights from political sciences history critical geography heritage studies and urban planning this book will be of interest to a wide range of researchers

Subaqueous Mass Movements and Their Consequences A. Georgiopoulou, L.A. Amy, S. Benetti, J.D. Chaytor, M.A. Clare, D. Gamboa, P.D.W. Haughton, J. Moernaut, J.J. Mountjoy, 2020-07-08 This GSL volume focuses on underwater or subaqueous landslides with the overarching goal of understanding how they affect society and the environment The new research presented here is the result of significant advances made over recent years in directly monitoring submarine landslides in standardising global datasets for quantitative analysis constructing a global database and leading international research projects This volume demonstrates the breadth of investigation taking place into subaqueous landslides and shows that while events like the recent ones in the Indonesian archipelago can be devastating they are at the smaller end of what the Earth has experienced in the past Understanding the spectrum of subaqueous landslide processes

and therefore the potential societal impact requires research across all spatial and temporal scales This volume delivers a compilation of state of the art papers covering topics from regional landslide databases to advanced techniques for in situ measurements to numerical modelling of processes and hazards

T&T Clark Companion to Methodism Charles Yrigoyen Jr,2014-09-25 The first volume in the T T Clark Companions series this volume is a handbook on Methodism containing an introduction dictionary of key terms and concentrates on key themes methodology and research problems for those interested in studying the origins and development of the history and theology of world Methodism The literature describing the history and development of Methodism has been growing as scholars and general readers have become aware of its importance as a world church with approximately 40 million members in 300 Methodist denominations in 140 nations The tercentenary celebrations of the births of its founders John and Charles Wesley in 2003 and 2007 provided an additional focus on the evolution of the movement which became a church This book researches questions problems and resources for further study
