Growing Up in a Changing Society Ronnie Carr, Paul Light, Martin Woodhead, 2014-02-04 The final reader in the Child Development in Social Context series shows how the study of child development is inevitably bound up in more ephemeral cultural ideas about the nature and needs of children and in the educational practices that rise from these ideas Some readings point to the dangers which can arise from the meeting of science and cultural values using for illustration studies of the role of psychological theory in reinforcing social attitudes to child care inside and outside the family Other readings look at children's initiation into that relatively recent cultural invention the school and the relationship with their learning at home There are studies of their social development in classroom and playground with particular emphasis on ethnic relationships

Child Perspectives and Children's Perspectives in Theory and Practice Dion Sommer, Ingrid Pramling Samuelsson, Karsten Hundeide, 2009-12-24 Recent decades have seen a growing emphasis in a number of professional contexts on acknowledging and acting on the views of children This trend was given added weight by the UN Convention on the Rights of the Child ratified in 1990 Today seeking the perspective of the child has become an essential process in all sorts of tasks from framing new legislation to regulating professions This book answers the fundamental question of what it is that constitutes a child perspective and how this might differ from the perspectives of children themselves The answers to such questions have important implications for building progressive and developmental adult child relationships However theoretical and empirical treatments of child perspectives and children's perspectives are very diverse and idiosyncratic and the standard reference work has yet to be written Thus this work is an attempt to fill the gap in the literature by searching for and defining key formulations of potential child perspectives within parts of the so called new child paradigm This has been derived from childhood sociology contextual relational developmental psychology interpretative humanistic psychology and developmental pedagogy The highly experienced authors develop a comprehensive professional child perspective paradigm that integrates recent theory and empirical child research With its clear presentation of underlying theories and suggested applications this book illustrates a child oriented understanding of specific relevance to
