Elkem produces a comprehensive range of inoculants for the manufacture of grey cast irons. These are suited to most application methods, ladle inoculation, in-stream inoculation or by addition in a wire.

The Elkem range of inoculants includes:

Superspeed® 75 or **Superspeed® 50** inoculants. The most widely used inoculant for grey irons of medium to high sulphur content. The low addition rates necessary to achieve maximum chill reduction mean that the iron is less prone to shrinkage.

Raseed® inoculant. Specifically designed for low base sulphur irons.

Foundisil® and **Barinoc®** inoculants. Particularly suited to low sulphur applications and irons which are subject to long pouring times. Other specialty inoculants are available.

Barinoc®, Foundisil®, Raseed® and **Superspeed®** are registered trademarks of Elkem ASA.

Please refer to your local Elkem representative for further information on the range of products available for grey, compacted and ductile irons.
