Reality and Accounting Richard Mattessich,2013-07-31 This book discusses and summarizes the revived interest in reality issues ontology within accounting economics and the information sciences with a view to informing scholars from these different disciplines about each other s endeavours in ontological research Even more importantly the book aims at familiarizing scholars from various disciplines with an evolutionary approach for examining questions about reality in the social sciences The book is based on a partly pluralistic approach that assures unity in diversity Unity because all existence arises from physical reality diversity because emergent properties create biological and social realities that cannot be reduced to physical phenomena Hence the book recognizes not only concrete but also abstract entities It shows however that the actualization of these abstract entities requires objectification and concrete manifestation This pluralistic approach is central to this book It also is a challenge to those who reject abstract entities as socially real as well as to those who defend a non realist position The major task of this book is to explore proposals towards a uniform ontological basis This uniform and universal presentation extends beyond traditional ontology asking what is real to such questions as on which reality level is something real and in which temporal and modal way is it real Such an extended analysis is relevant to accountants

economists information scientists other social scientists as well as philosophers
