Biochemical Engineering and Biotechnology Handbook Bernard Atkinson, Ferda Mavituna, 1991 **A Handbook Of Biotechnology** Vipul Somani, 2005-01-01 *Handbook of Biotechnology and Chemical Engineering* P. Ponmurugan, 2011-07 *Biotechnology Handbook* NIIR Board, 2003-08-09 Biotechnology is a field of applied biology that involves the use of living organisms and bioprocesses in engineering, technology, medicine and other fields requiring bio-products. Biotechnology also utilizes these products for manufacturing purposes. Modern use of similar terms includes genetic engineering as well as cell and tissue culture technologies. Biotechnology draws on the pure biological sciences and in many instances is also dependent on knowledge and methods from outside the sphere of biology. Conversely, modern biological sciences are intimately entwined and dependent on the methods developed through biotechnology and what is commonly thought of as the life sciences industry. It has a major application in modern brewing technology which includes the production of whisky, traditional fermented soybean foods, bacterial biomass, cheese starters, cheese technology, L-glutamic acid fermentation etc. Biotechnology and cell/molecular biology have developed and emerged into a major discipline during the last two decades. Biotechnology is also used to recycle, treat waste, microbial treatment and utilization of waste. The growing global demand for biotechnology products in India has rich biodiversity that drives its clinical trials industry and forms a strong base for pharmaceutical research. In recent years, the worldwide biotechnology based products market has grown at an annual average rate of 15%. This book majorly deals with introduction to basic biotechnology, downstream processing in biotechnology, modern brewing technology, industrial chemicals, biochemical and fuels, microbial flavours and fragrances, biodegradation of non-cellulosic wastes for environmental conservation and fuel production, landfills for treatment of solid wastes etc. This book also consists of addresses of machinery suppliers, addresses of chemical suppliers, list of universities conducting Biotechnology courses in the directory section.
