engendered tools that now predominate all corners of the workplace. The ascendancy of new hardware and software poses new challenges for professionals in the field of management and human resources as corporations and companies routinely implement and incorporate digital software for goals such as improving worker productivity and tasks such as screening highly qualified candidates for vacancies. In the face of rapid change, professionals must investigate how the use of digital technology affects the culture of hiring processes, employee morale, company management, and corporate image. This book aims to promote research related to these new trends and open a new field within the areas of management and engineering. Through the course of nine chapters, contributors to *Management and Technological Challenges in the Digital Age* grapple with the theoretical and practical implications that technological usage carries across the range of small and large organizations in the world of business. Focuses on the latest research findings that are occurring in this field in different countries. Shows how companies around the world are facing today's technological challenges. Shares knowledge and insights on an international scale. Keeps the readers and researchers informed about the latest developments in the field and forthcoming international studies. Explains how the use of technology allows management to take a more strategic role in organizations. This book affords a thorough engagement with the progresses and setbacks made through the enlistment of technological equipment and computerized procedures in the field of human resources and management while interrogating the future challenges of technology's role.

Engineering Effective Decision Support Technologies: New Models and Applications Power, Daniel J., 2013-05-31. In modern information-centric business environments, Decision Making Support Systems (DMSS) present a critical consideration for any organization serious about maintaining competitive advantage. Advances in information systems, knowledge management technologies, and other decision support systems necessitate a critical understanding of the latest trends and research. *Engineering Effective Decision Support Technologies: New Models and Applications* presents a collection of the latest research in DMSS and applies those theoretical considerations to best practices in the field. This reference includes empirical case studies and an analysis of new models and perspectives in knowledge management, promoting discussion of DMSS strategies among managers, researchers, and students of information science.
