Optimal Design and Control Jeff Borggaard, John Burkhardt, Max Gunzburger, Janet Peterson, 2012-12-06 This volume is the proceedings of the Workshop on Optimal Design

and Control that was held in Blacksburg Virginia April 8 9 1994 The workshop was sponsored by the Air Force Office of Scientific Research through the Air Force Center for Optimal Design and Control CODAC at Virginia Tech The workshop was a gathering of engineers and mathematicians actively involved in innovative research in control and optimization with emphasis placed on problems governed by partial differential equations The interdisciplinary nature of the workshop and the wide range of subdisciplines represented by the participants enabled an exchange of valuable information and also led to significant discussions about multidisciplinary optimization issues One of the goals of the workshop was to include laboratory industrial and academic researchers so that analyses algorithms implementations and applications could all be well represented in the talks this interdisciplinary nature is reflected in these proceedings An overriding impression that can be gleaned from the papers in this volume is the complexity of problems addressed by not only those authors engaged in applications but also by those engaged in algorithmic development and even mathematical analyses Thus in many instances systematic approaches using fully nonlinear constraint equations are routinely used to solve control and optimization problems in some cases replacing ad hoc or empirically based procedures
