Memorandum Geography Paper 1 2011:

Saving More Than Seeds Catherine Phillips, 2016-04-01 Saving More Than Seeds advances understandings of seed people relations with particular focus on seed saving The practice of reusing and exchanging seeds provides foundation for food production and allows humans and seed to adapt together in dynamic socio-natural conditions But the practice and its practitioners are easily taken for granted even as they are threatened by neoliberalisation Combining original ethnographic research with investigation of an evolving corporate seed order this book reveals seed saving not only as it occurs in fields and gardens but also as it associates with genebanking genetic engineering intellectual property rights and agrifood regulations Drawing on diverse social sciences literatures Phillips illustrates ongoing practices of thinking feeling and acting with seeds raising questions about what seed people relations should accomplish and how different ways of relating might be pursued to change collective futures

Placing the Border in Everyday Life Reece Jones, Corey Johnson, 2016-04-22 Bordering no longer happens only at the borderline separating two sovereign states but rather through a wide range of practices and decisions that occur in multiple locations within and beyond the state's territory Nevertheless it is too simplistic to suggest that borders are everywhere since this view fails to acknowledge that particular sites are significant nodes where border work is done Similarly border work is more likely to be done by particular people than others This book investigates the diffusion of bordering narratives and practices by asking who borders and how *Placing the Border in Everyday Life* complicates the connection between borders and sovereign states by identifying the individuals and organizations that engage in border work at a range of scales and places This edited volume includes contributions from major international scholars in the field of border studies and allied disciplines who analyze where and why border work is done By combining a new theorization of border work beyond the state with rich empirical case studies this book makes a ground breaking contribution to the study of borders and the state in the era of globalization

Assembling Bus Rapid Transit in the Global South Malve Jacobsen, 2020-12-13 This book explores the mobile ethnography of Dar es Salaam where consultants and politicians have

planned and implemented a bus rapid transit BRT system for two decades It analyses the dual processes of assembling BRT in the Tanzanian metropolis and establishing BRT as a policy model of and for the Global South The book elucidates how policy models are constructed and circulated around the globe and depicts the processes by which they are translated between and materialise within specific contexts It presents the case of BRT to demonstrate how technocrats shape these processes through persuasive work aimed at disseminating and stabilising this transport model and how local actors influence its adaptation in Dar es Salaam The book adopts a double mobility approach to show how this ethnography follows travelling consultants circulating policies and moving buses to explore the fluidity of the BRT model Linking key debates in policy mobility studies and Science and Technology Studies enriched with postcolonial perspectives and geographies of transport and infrastructure it offers new insights into the technopolitics of planning and implementing infrastructure systems This book will appeal to academics and students of human geography transport studies science and technology studies and African and development studies interested in the technopolitics of transport planning
