Beyond Modernist Masters

Felipe Hernández,2009-11-20 Latin America has been an important place for architecture for many decades Masters like Barrag n Dieste Lina Bo Bardi and Niemeyer pointed the way for architectural design all over the world and they continue to do so today Their approach to colors materials and walls had a deep and lasting influence on architectural modernism Since then however and especially in the last fifteen years architecture on the continent has continued to evolve and a lively and extremely creative architecture scene has developed The work of Latin American architects and city planners is often guided by social issues for example the approach to informal settlements on the outskirts of big cities the scarcity of housing and public space the availability of affordable transportation and the important role of cultural infrastructure such as schools libraries and sports facilities as a catalyst for neighborhoods Within this context the book considers numerous projects that have prompted discussion and provided fresh impetus all across Latin America Outstanding projects like the Santo Domingo Library in Medellin Colombia by Giancarlo Mazzanti Alberto Kalach s Liceo Franco Mexicano in Mexico and the works of Alejandro Aravena in Chile show that recent Latin American architecture is more than capable of holding its own beside the works of the founders Felipe Hern ndez is an architect and professor of Architectural Design History and Theory at The University of Liverpool He attended an MA in Architecture and Critical Theory graduating with distinction in 1998 and received his PhD from the University of Nottingham in 2003 He has taught at the Bartlett School of Architecture UCL The Universities of Nottingham Sheffield East London and Nottingham Trent in the United Kingdom as well as at Brown

University and Roger Williams University in USA Felipe has published numerous essays and articles examining the situation of contemporary Latin American cities and revealing the multiplicity of architectural practices that operate simultaneously in the constant re shaping of the continent s cities

An Intertwined History Macarena de la Vega de León,2018 Abstract This dissertation explores the writing of history through the close reading of William J R Curtis s *Modern Architecture Since 1900* 1982 Curtis s book lies in a transitional period in the history of modern architecture between the establishment of research degrees in North American schools in the 1970s and the consolidation of the discipline as the subject matter of historiographical research in the 1990s These developments culminated in 1999 with a major methodological reassessment of the history of modern architecture its education and its scholarly study in journals such as JSAH and JAE The study of postcolonial theories in architecture also at the turn of the century challenged the previously accepted canon of architectural history by urging the development of a global history of architecture which remains today undefined Curtis worked on the first edition as a young researcher in North America in the late 1970s and on the definitive edition of the book in the early 1990s *Modern Architecture Since 1900* is exemplary of and contemporary to these developments
