**The Anatomy of Competition in Sports** Christopher B. Doob, 2015-06-17 Thousands of children across the United States dream of becoming professional athletes yet less than one in a thousand high school seniors will go on to play in a major pro league Of those select few many will find that after a childhood of full time commitment to their sport their professional careers will likely be brief and injury ridden Within each of the top professional leagues in the U S the competition is fierce to not only get into the league but to stay there the average career in the National Basketball Association lasts less than five years and in the National Football League only three and a half *The Anatomy of Competition in Sports: The Struggle for Success in Major US Professional Leagues* examines the role competition plays in each of the major sports leagues in the United States Major League Baseball MLB the National Football League NFL the National Basketball Association NBA the Women s National Basketball Association WNBA the National Hockey League NHL and Major League Soccer MLS In order to provide a comprehensive review of competition within each sport Christopher B Doob scrutinizes the challenges faced at the youth level opposition encountered by individuals competing to join a pro league the obstacles pros must overcome throughout their careers and the history of each league Furthermore Doob dissects competition across the sports by looking at such common influences as family school colleges the draft process coaches and the playing conditions within the professional leagues An additional chapter examines so called atypical pros such as disabled athletes gay and lesbian players and two sport pros who must face competitive challenges beyond the average athlete A final chapter discusses life after the pros including the legacy of debilitating injuries many former players face and the prospects of post retirement jobs such as coaching managing and broadcasting Highlighting the struggles many athletes must face *The Anatomy of Competition in Sports* features vignettes about current and past professionals including Mariano Rivera Earl Campbell Candace Parker and Sidney Crosby Drawing on diverse sources such as histories of each league research studies newspaper accounts and personal narratives this book is simultaneously thought provoking and accessible for all sports fans

*Determinants of Achievement in Top Sport* Matej Maksimiljan Tusak, Tiziano A. Agostini, Donatella Di Corrado, 2026-03-05 Success in competitive sports depends primarily on athletes skills personality and motivation Many studies have investigated the determinants of success The presence of the zeitgeist social cognitive perspective in psychology has shifted the focus to motivation in top sports Social cognitive approaches have become the primary framework for researching almost everything in psychology Despite extensive discussion and research on the relationship between motivation and personality characteristics there is still a lack of evidence connecting psychological preparation pre competitive states and psychological techniques to sports success and efficiency There is still a gap in determining which psychological approaches and mental techniques contribute to success in top sports Different regression models are expected to explore the determinants of success by comparing males and females as well as young athletes versus top

athletes The final formula for success is still undefined regarding the importance of pre competitive states psychological preparation technical skills and knowledge Techniques of psychological preparation such as hypnosis visualization or cognitive stress coping techniques are not clearly defined and discussed Therefore addressing this gap is crucial The following goals should be discussed Psychological factors contributing to success in top sports motivational variables contributing to success in top sports personality structures contributing to top achievements stress and coping strategies in top sports the use of psychological preparation and its relation to top achievement in sports evidence based research on specific psychological preparation techniques and their effectiveness in helping athletes achieve top performances pre competition states and their relation to success in top sports differences in psychological characteristics contributing to top achievements between males and females and between youth athletes and top athletes important factors in the development of motivation for success in athletes ethics and strategies to emphasize fair play in top sports the era of COVID 19 and its relationship to success in top sports including correlation with specific psychological factors Researchers are invited to submit original research to contribute to this topic We also welcome brief research reports systematic reviews and meta analyses reviews and theoretical articles By understanding the factors contributing to success in top athletes we can develop strategies to improve their results and effectiveness
