Operations Management Contemporary Concepts And Cases

Roger G. Schroeder

Operations Management Contemporary Concepts And Cases:

Operations Management Roger G. Schroeder, Susan Meyer Goldstein, M. Johnny Rungtusanatham, 2008 *Operations Management Contemporary Concepts and Cases* is an ideal book for the instructor seeking a short text with cases. This book employs a cross functional perspective appealing to non majors and practical for use in an MBA level course in operations management. The size and price of the book also make the text attractive for the cross functional curriculum where students are required to purchase more than one text. The cases offer variety in length and rigor and several are from Harvard and Darden. This mix makes the book appropriate for both undergraduates and MBA students. Operations Management Roger G. Schroeder, 2011. Employs a cross functional perspective appealing to non majors and practical for use in an MBA level course in operations management. This book is suitable for both undergraduates and MBA students. **Operations**

Management: Contemporary Concepts and Cases Roger Schroeder, 2007-11-12 *Operations Management Contemporary Concepts and Cases* is an ideal book for the instructor seeking a short text with cases. This book employs a cross functional perspective appealing to non majors and practical for use in an MBA level course in operations management. The size and price of the book also make the text attractive for the cross functional curriculum where students are required to purchase more than one text. The cases offer variety in length and rigor and several are from Harvard and Darden. This mix makes the book appropriate for both undergraduates and MBA students. Operations Management Roger G. Schroeder, 2000

Operations Management Roger G. Schroeder, 2004. Selected Chapters from Operations Management Roger G. Schroeder, 2005. Operations Management Roger G. Schroeder, 2000. Operations Management Jumah Mifsud, 2014-11-15. Operations management is an area of management concerned with overseeing, designing and controlling the process of production and redesigning business operations in the production of goods or services. It involves the responsibility of ensuring that business operations are efficient in terms of using as few resources as needed and effective in terms of meeting customer requirements. It is concerned with managing the process that converts inputs in the forms of raw materials, labor and energy into outputs in the form of goods and or services. The relationship of operations management to senior management in commercial contexts can be compared to the relationship of line officers to highest level senior officers in military science. The highest level officers shape the strategy and revise it over time while the line officers make tactical decisions in support of carrying out the strategy. In business as in military affairs the boundaries between levels are not always distinct. tactical information dynamically informs strategy and individual people often move between roles over time.
