**Climate Change - A Law Of Nature** Fabian Brunner,2022-02-11 Instead of adapting to the changing climate all the relevant groups in German society have joined forces to combat climate change No attempt has been made to avoid technical efforts or costly measures The energy transition and the Green Deal have tremendous consequences for the state society and individuals Public debate has tended to ignore these consequences and has failed to consider the cost Dr Fabian Brunner analyses the mode of operation of the energy transition and comes to the conclusion that it has set in motion a spiral that will fundamentally transform the German economic system rather than the global climate Not only the climate has points of no return after which interventions will no longer be possible This also applies to the economy when these points have been passed it will no longer be possible to prevent an extreme loss of prosperity for future generations

**Corporate Governance in Tanzania** Peter C. Mhando,2019-04-30 Increasingly the importance of corporate governance for economic development in developing economies like Tanzania is indisputable This book explores the effectiveness of corporate governance in Tanzania and asks how it can be further developed and improved so as to make a difference in the contribution of state owned enterprises to the economy The book tries as fairly as possible to probe further into effective corporate governance using cases of public entities highlighting shortfalls in their governance and the consequent multiplier effects on socio economic life On the other hand the book also aims to present examples of good governance in multi layered ways to show that there is room for creativity and innovation in applying principles of good corporate governance Recognising that context is crucial the book starts by assessing Tanzania s socio historical and economic context and gauging various applicable metrics Using historical and theoretical lenses including the ethics accountability relationship the author aims to improve our understanding of corporate failures and consequent waste in Tanzania Explaining failures in governance is far from straightforward as by definition they operate beyond rules and regulations systems and processes yet the author draws from decades of local experience and expertise in order to assess the real situation on the ground The Tanzania case will be of considerable interest to researchers looking at questions of corporate governance and economic development both within the country itself and across Africa
