Becker, Ralph Sherman Becker

Chemistry Chapter 9 Assessment:

Research and Practice in Chemistry Education Madeleine Schultz, Siegbert Schmid, Gwendolyn A. Lawrie, 2019-04-06

This book brings together fifteen contributions from presenters at the 25th IUPAC International Conference on Chemistry Education 2018 held in Sydney. Written by a highly diverse group of chemistry educators working within different national and institutional contexts with the common goal of improving student learning, the book presents research in multiple facets of the cutting edge of chemistry education, offering insights into the application of learning theories in chemistry combined with practical experience in implementing teaching strategies. The chapters are arranged according to the themes: novel pedagogies, dynamic teaching environments, new approaches in assessment and professional skills, each of which is of substantial current interest to the science education communities. Providing an overview of contemporary practice, this book helps improve student learning outcomes. Many of the teaching strategies presented are transferable to other disciplines and are of great interest to the global community of tertiary chemistry educators as well as readers in the areas of secondary STEM education and other disciplines.

Prentice Hall Chemistry, 2000

Clinical Chemistry Wendy L Arneson, Jean M Brickell, 2007-01-25

Meet the learning needs of today's students with a brand new style of textbook designed to excite your students' interest in clinical chemistry. Organized almost entirely around organ systems to parallel the way physicians order tests, this groundbreaking text teaches the concepts and principles of clinical chemistry through realistic situations and scenarios. By integrating pathophysiology, biochemistry, and analytical chemistry for each major system, students clearly see the relevance of what they are learning to their future careers. This practical approach encourages them how to apply theoretical principles in the laboratory and to develop important critical thinking skills.

TRAC: Trends in Analytical Chemistry U A Th Brinkman, A. E. Bruno, A. L. Burlingame, 2013-09-17

TRAC Trends in Analytical Chemistry Volume 10 presents relevant topics in global analytical chemistry research. This book discusses the potential of flow injection analysis for water quality monitoring. Organized into 27 parts encompassing 67 chapters, this book begins with an overview of the amount of published information on analytical chemistry research. This text then examines the analytical technique in the electrophoretic separations in narrow bore tubes, which is capable of rapid high resolution separations of water soluble components in small sample volumes. Other chapters consider the application of polynomial and B-spline interpolation to the description of cyclic voltammetric features. This book discusses as well the methods used to investigate the properties of ceramic high transition temperature superconductors. The final chapter deals with the importance of monitoring and protecting the environment based on measurement campaigns. This book is a valuable resource for analytical chemists, environmental chemists, and biochemists. Pharmacologists, scientists, students, researcher workers, and other practitioners will also find this book useful.
