Author Jamil Soucar has passionately worked in the construction industry since 1983. He holds a Bachelor's degree in Civil Engineering, a Certificate in Engineering Management for Construction from UCLA, and is licensed as a B General Contractor. He has a construction management consulting business in Los Angeles through which he consults to general contractors, owners, and architects and provides expert witness service to construction attorneys. Jamil has overseen over 500 projects from inception to closeout. He has worked as a superintendent, a project manager for contractors, and a construction manager consulting to owners. He has worked in civil engineering design and drafting surveys. Jamil was inspired to write this book after teaching construction management at night to working adults. He realized the need for construction management taught from the perspective of real life experiences.

[Contractor's Guide to Green Building Construction](#) Thomas E. Glavinich, Associated General Contractors, 2008-04-07. Written for contractors and endorsed by the Associated General Contractors of America. Written specifically for contractors, this book enables you to meet the challenges of green building construction. You will discover how constructing environmentally friendly, sustainable buildings influences project management, delivery, documentation, and risk. Moreover, the book guides you through these important considerations at all phases of a green construction project, including Bidding and Contracting, Managing Green Design when the contractor works as a design builder, Subcontracting, Procurement, Construction Management, Project Commissioning, and Closeout. This book is endorsed by the Associated General Contractors of America (AGC) and was written with the assistance and advice of a specially assembled AGC task force. With a focus on the green building process from the contractor's viewpoint, the book avoids endorsing any one green building rating system in favor of presenting the business fundamentals common to them all. Throughout the presentation, flowcharts and other features offer working tools for successfully managing green construction projects. Plus, real-world case studies developed through discussions with the actual contractors involved help you understand exactly what to expect and how to best manage constructing a green building. In short, this is one book that you need to have on hand to be a part of the rapidly growing green building movement.

Construction Business Management Nick B. Ganaway, 2006-10-06. Less than half of construction firms are still in business after four years. Make sure your company thrives with essential and very readable guidance from a pro with 25 years' success. Find out what it takes to build all aspects of a business that's profitable, enjoyable, and enduring. Here are just a few of the things you will learn from this book: The duties of the owner of a successful construction business; Essential terms and conditions to include and exclude in contracts; Commandments to follow to ensure you're paid what you're owed, including step-by-step change order procedures to avoid disputes and non-payment; Strict dos and don'ts of mechanics liens, including when an owner goes bankrupt; What must be done administratively before breaking ground on every project; How to select, hire, and keep golden employees; Effective marketing, even the smallest contractor can afford; How to identify the accountants, lawyers, and insurance agents that are right for you; The what, when, where, and why of licensing and registration; The advantages of specializing, including the

opportunities in chain store construction Whether you re a contractor a key employee a subcontractor a student or a facility executive you ll find many ideas you can immediately add to your management and leadership toolbox Adopting even a single one of them will pay dividends now and throughout your career

Field Guide for Construction Management Dennis H. Sanders,2011-12-19 From any perspective the ideal construction project is one in which the contractor shows up on your doorstep with the right price and all of his tools people and equipment ready to start and builds exactly what you want for the price you want and finish on schedule Everyone then goes away happy as clams This is the ideal but it never occurs The world is a competitive place to survive contractors must think competitively in order to win work They must find a way to complete a quality project for the lowest price Circumstances can easily derail even the best plans and contractors but with planning delays and cost overruns can be minimized This handbook helps guide the construction manager through the trials and tribulations of selecting expecting rejecting prompting requiring and documenting what the contractor produces on the project Contracts can be written that foresee common problems and provide the construction manager with their resolution The concepts in *Field Guide for Construction Management* can help you do just that
