Genetic Engineering

We are now able to isolate **DNA molecules** and determine their base sequence using a variety of biological and chemical techniques.

- The **study** of the human genome's complete base sequence as well as the genomes of numerous other organisms, including pathogenic bacteria, has the potential to transform **both** biology and medicine.

Genetic engineering

(in the case of agricultural plant modification)

This section depicts a portion of the significant methods involved in recombinant DNA innovation at the core of which is DNA cloning.

DNA CLONING

Since DNA atoms are made out of just four nucleotides, their physical and compound **properties** are practically the same. A clone is a population of cells that came from a single **original** cell and will all have the same genetic make-up if there is no mutation.

In the examples we will present, the fundamental method for cloning a gene is to introduce DNA into **bacterial** cells using the genetic material from the cell of interest.
