**To Fix or To Heal** Joseph E. Davis,Ana Marta Gonzalez,2016-02-26 Do doctors fix patients Or do they heal them For all of modern medicine s many successes discontent with the quality of patient care has combined with a host of new developments from aging populations to the resurgence of infectious diseases which challenge medicine s

overreliance on narrowly mechanistic and technical methods of explanation and intervention or fixing patients. The need for a better balance for more humane healing rationales and practices that attend to the social and environmental aspects of health and illness and the experiencing person is more urgent than ever. Yet in public health and bioethics the fields best positioned to offer countervailing values and orientations the dominant approaches largely extend and reinforce the reductionism and individualism of biomedicine. The collected essays in *To Fix or To Heal* do more than document the persistence of reductionist approaches and the attendant extension of medicalization to more and more aspects of our lives. The contributors also shed valuable light on why reductionism has persisted and why more holistic models incorporating social and environmental factors have gained so little traction. The contributors examine the moral appeal of reductionism, the larger rationalist dream of technological mastery, the growing valuation of health and the enshrining of individual responsibility as the seemingly non-coercive means of intervention and control. This paradigm-challenging volume advances new lines of criticism of our dominant medical regime even while proposing ways of bringing medical practice, bioethics, and public health more closely into line with their original goals. Precisely because of the centrality of the biomedical approach to our society, the contributors argue, challenging the reductionist model and its ever-widening effects is perhaps the best way to press for a much-needed renewal of our ethical and political discourse.

*Foundations of Addictions Counseling* Dave Capuzzi, Mark D. Stauffer, 2024. Whether you are entering the field of addictions counseling or are a counselor who wants to be prepared for the screening, assessment, and treatment of addiction in your practice, this text provides a foundational basis. *Foundations of Addictions Counseling* addresses real-life clinical concerns while providing the necessary information to keep up to date with trends. It also addresses the evolving standards of professional organizations, accrediting bodies, licensure boards, and graduate programs and departments. Counselors in school, mental health, rehabilitation, hospital, private practice, and a variety of other settings must be thoroughly prepared to support clients in their quest to be healthy and unimpaired. As the addictions profession has matured, more and more emphasis has been placed on the importance of preparing counselors to work holistically and synthesize knowledge domains from mental health, developmental, and addiction perspectives. The authors provide this knowledge in support of your work on behalf of various clients and diverse communities. Counselors can expect some of their clients to want to address concerns connected with the use of substances and the development of addictive behavior. This book draws on the specialized knowledge for each contributed chapter. It is written for use in graduate-level preparation programs for counselors. Because of the clarity of the writing and the use of case studies, it may also be adopted in some undergraduate and community college courses. Requirements of the Council for the Accreditation of Counseling and Related Educational Programs (CACREP) and other certification associations have led most university programs in counselor education to require an addictions course for all students, regardless of specialization: school, community, rehabilitation, couples, marriage, and family, student personnel, etc. Addictions counseling is also being offered for

CADC I and II certifications which require undergraduate coursework related to addictions counseling The book is designed for students taking a preliminary course in addictions counseling It presents a comprehensive overview of the foundations of addictions counseling the skills and techniques needed for addictions counseling and addictions counseling in specific settings As editors we know that one text cannot adequately address all the complex and holistic factors involved in assisting clients who present with issues related to addictive behavior We have however attempted to provide our readers with a broad perspective based on current professional literature and the rapidly changing world we live in at this juncture of the new millennium The following overview highlights the major features of the text
