Cost-Based Oracle Fundamentals Jonathan Lewis, 2005-11-02 The question Why isn't Oracle using my index must be

one of the most popular or perhaps unpopular questions ever asked on the Oracle help forums You've picked exactly the right columns you've got them in the ideal order you've computed statistics you've checked for null columns and the optimizer flatly refuses to use your index unless you hint it What could possibly be going wrong If you've suffered the frustration of watching the optimizer do something completely bizarre when the best execution plan is totally obvious or spent hours or days trying to make the optimizer do what you want it to do then this is the book you need You'll come to know how the optimizer thinks understand why it makes mistakes and recognize the data patterns that make it go awry With this information at your fingertips you will save an enormous amount of time on designing and trouble shooting your SQL The cost based optimizer is simply a piece of code that contains a model of how Oracle databases work By applying this model to the statistics about your data the optimizer tries to efficiently convert your query into an executable plan Unfortunately the model can't be perfect your statistics can't be perfect and the resulting execution plan may be far from perfect In *Cost Based Oracle Fundamentals* the first book in a series of three Jonathan Lewis one of the foremost authorities in this field describes the most commonly used parts of the model what the optimizer does with your statistics and why things go wrong With this information you'll be in a position to fix entire problem areas not just single SQL statements by adjusting the model or creating more truthful statistics
