This volume brings together educational effectiveness research and international large scale assessments demonstrating how the two fields can be applied to inspire and improve each other and providing readers direct links to instruments that cover a broad range of topics and have been shown to work in more than 70 countries The book s initial chapters introduce and summarize recent discussions and developments in the conceptualization implementation and evaluation of international large scale context assessments and provide an outlook on possible future developments Subsequently three thematic sections Student Background Outcomes of Education Beyond Achievement and Learning in Schools each present a series of chapters that provide the conceptual background for a wide range of important topics in education research policy and practice Each chapter defines a conceptual framework that relates recent findings in the educational effectiveness research

literature to current issues in education policy and practice These frameworks were used to develop interesting and relevant indicators that may be used for meaningful reporting from international assessments other cross cultural research or national studies Using the example of one particular survey the Programme for International Student Assessment PISA 2015 this volume links all theoretical considerations to fully developed questionnaire material that was field trailed and evaluated in questionnaires for students and their parents as well as teachers and principals in their schools The primary purposes of this book are to inform readers about how education effectiveness research and international large scale assessments are already interacting to inform research and policymaking to identify areas where a closer collaboration of both fields or input from other areas could further improve this work to provide sound theoretical frameworks for future work in both fields and finally to relate these theoretical debates to currently available and evaluated material for future context assessments

and organized topically Life Span Development A Topical Approach maintains the student friendliness that has been the hallmark of Feldman's other development textbooks. It is rich in examples and illustrates the applications that can be derived from the research and theory of lifespan developmentalists. It pays particular attention to the applications that can be drawn from theory and research in the field. To optimize student learning and to provide instructors with maximum flexibility, the book uses a modular approach. Consequently, rather than facing long, potentially daunting chapters, students encounter material that is divided into smaller, more manageable chunks, modules. Presenting material in small chunks represents a structure that research long ago found to be optimum for promoting learning. This book is available with MyDevelopmentLab, which includes a full eText, videos, self-tests, flashcards, and MyVirtualChild, the interactive simulation which allows you to raise a virtual child from birth to age 18 and monitor the effects of your parenting decisions.
