Technology roadmap Michael Murphy,2013 Electric Vehicle Roadmap for Connecticut Connecticut. Department of Energy and Environmental Protection,2019 IEA Technology Roadmaps Technology Roadmap IEA.,2009 This energy technology roadmap focuses on electric and plug in hybrid vehicles EV PHEV presenting for the first time a detailed scenario for their evolution from annual production of a few thousand to over 100million vehicles by 2050 It finds that the next decade is a key make or break period for EVs and PHEVs governments the automobile industry electric utilities and other stakeholders must work together to roll out vehicles and infrastructure in a coordinated fashion and ensure that the rapidly growing consumer market is ready to purchase them The roadmap concludes with a set of near term actions to achieve the roadmap s vision Overcoming Barriers to Electric-Vehicle Deployment National Research Council,Transportation Research Board,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee on Overcoming Barriers to Electric-Vehicle Deployment,2013-06-18 The electric vehicle offers many promises increasing U S energy security by reducing petroleum dependence contributing to climate change initiatives by decreasing greenhouse gas GHG emissions stimulating long term economic growth through the development of new technologies and industries and improving public health by improving local air quality There are however substantial technical social and economic barriers to widespread adoption of electric vehicles including vehicle cost small driving range long charging times and the need for a charging infrastructure In addition people are unfamiliar with electric vehicles are uncertain about their costs and benefits and have diverse needs that current electric vehicles might not meet Although a person might derive some personal benefits from ownership the costs of achieving the social benefits such as reduced GHG emissions are borne largely by the people who purchase the vehicles Given the recognized barriers to electric vehicle adoption Congress asked the Department of Energy DOE to commission a study by the National Academies to address market barriers that are slowing the purchase of electric vehicles and hindering the deployment of supporting infrastructure As a result of the request the National Research Council NRC a part of the National Academies appointed the Committee on Overcoming Barriers to Electric Vehicle Deployment This committee documented their findings in two reports a short interim report focused on near term options and a final comprehensive report Overcoming Barriers to Electric Vehicle Deployment fulfills the request for the short interim report that addresses specifically the following issues infrastructure needs for electric vehicles barriers to deploying the infrastructure and possible roles of the federal government in overcoming the barriers This report also includes an initial discussion of the pros and cons of the possible roles This interim report does not address the committee s full statement of task and does not offer any recommendations because the committee is still in its early stages of data gathering The committee will continue to gather and review information and conduct analyses through late spring 2014 and will issue its final report in late summer 2014 Overcoming Barriers to Electric Vehicle Deployment focuses on the light duty vehicle sector

in the United States and restricts its discussion of electric vehicles to plug in electric vehicles PEVs which include battery electric vehicles BEVs and plug in hybrid electric vehicles PHEVs The common feature of these vehicles is that their batteries are charged by being plugged into the electric grid BEVs differ from PHEVs because they operate solely on electricity stored in a battery that is there is no other power source PHEVs have internal combustion engines that can supplement the electric power train Although this report considers PEVs generally the committee recognizes that there are fundamental differences between PHEVs and BEVs

A Guide to the EV Charging Business Dr Maxwell Shimba, 2024-01-03 In the inexorable march towards a sustainable and electrified future the role of electric vehicles EVs stands prominently at the forefront of innovation As the automotive landscape undergoes a transformative shift so does the infrastructure that powers this evolution The Future of EV Charging is an immersive exploration into the dynamic realm of electric vehicle charging unraveling its intricate past decoding the present landscape and forecasting the compelling future that lies ahead The journey commences with a historical odyssey tracing the emergence of experimental electric carriages in the mid 19th century Pioneers like Thomas Parker and Gustave Trouv take center stage their contributions serving as foundational stones in the narrative of early electric vehicle development We navigate through the bustling streets of cities like London and Paris witnessing the introduction of electric taxis and delivery vehicles marking a significant chapter in the urban integration of EVs Chapter by chapter the book unfolds the technological tapestry of EV charging From the various types of charging stations Level 1 Level 2 and DC fast chargers to the intricacies of charging connectors and standards readers are guided through the evolving landscape of charging technology Smart charging solutions an essential facet of the contemporary charging infrastructure are unraveled showcasing how connectivity and data analytics are shaping the future of electric mobility Delving deeper the book explores market trends and opportunities dissecting the global growth of the EV market dissecting government incentives and unearthing the vast business prospects within the EV charging industry It s a comprehensive journey into the driving forces behind the surge in EV demand the importance of government incentives and regulations and the significant investments in charging infrastructure The subsequent chapters offer a blueprint for those seeking to venture into the world of EV charging From planning and strategizing an EV charging business to the intricacies of building and managing charging stations the book serves as a guide for entrepreneurs investors and policymakers navigating the burgeoning EV ecosystem Through case studies and success stories the book introduces readers to industry trailblazers providing insights into their strategies innovations and the challenges they ve overcome The appendix acts as a valuable resource offering additional reading materials useful websites and a glossary of terms to assist both novices and seasoned enthusiasts in navigating the evolving language of EV charging The Future of EV Charging is not just a book it s a roadmap to an electrified future a future where sustainable transportation is not merely a concept but an everyday reality As electric vehicles continue to reshape the automotive landscape this book serves as a guiding beacon illuminating the path towards a future where EV charging
