Period Domains over Finite and p-adic Fields Jean-François Dat, Sascha Orlik, Michael Rapoport, 2010-07-08 This book is on the one hand a pedagogical introduction to the formalism of slopes of semi stability and of related concepts in the simplest possible context It is therefore accessible to any graduate student with a basic knowledge in algebraic geometry and algebraic groups On the other hand the book also provides a thorough introduction to the basics of period domains as they appear in the geometric approach to local Langlands correspondences and in the recent conjectural p adic local Langlands program The authors provide numerous worked examples and establish many connections to topics in the general area of

algebraic groups over finite and local fields In addition the end of each section includes remarks on open questions historical context and references to the literature

Perfectoid Spaces: Lectures from the 2017 Arizona Winter School Bryden Cais, Bhargav Bhatt, Ana Caraiani, Kiran S. Kedlaya, Peter Scholze, Jared Weinstein, 2019-10-01 Introduced by Peter Scholze in 2011 perfectoid spaces are a bridge between geometry in characteristic 0 and characteristic p and have been used to solve many important problems including cases of the weight monodromy conjecture and the association of Galois representations to torsion classes in cohomology In recognition of the transformative impact perfectoid spaces have had on the field of arithmetic geometry Scholze was awarded a Fields Medal in 2018 This book originating from a series of lectures given at the 2017 Arizona Winter School on perfectoid spaces provides a broad introduction to the subject After an introduction with insight into the history and future of the subject by Peter Scholze Jared Weinstein gives a user friendly and utilitarian account of the theory of adic spaces Kiran Kedlaya further develops the foundational material studies vector bundles on Fargues Fontaine curves and introduces diamonds and shtukas over them with a view toward the local Langlands correspondence Bhargav Bhatt explains the application of perfectoid spaces to comparison isomorphisms in p adic Hodge theory Finally Ana Caraiani explains the application of perfectoid spaces to the construction of Galois representations associated to torsion classes in the cohomology of locally symmetric spaces for the general linear group This book will be an invaluable asset for any graduate student or researcher interested in the theory of perfectoid spaces and their applications

IMU, ICM, Medals, Prizes, and Laureates Ravi P. Agarwal, 2025-10-19 The book begins with the formal establishment of the International Mathematical Union IMU and its purpose of promoting international cooperation in mathematics by supporting and assisting the international Congress of Mathematicians ICM every four years The book presents the most important features of each ICM from 1897 to 2022 including the history of various medals and awards particularly the Fields Medal which is regarded as one of the highest honors a mathematician can receive and has been described as the Nobel Prize of mathematics For each Laureate the book provides their family background a short description of the work that led to the award a history of academic jobs research conducted after receiving the award and a list of further honors and awards This book will stimulate all mathematicians especially students who think that mathematics is less rewarding compared to other disciplines
