

The cover image features a close-up of green and purple grapes on the left, a wine glass filled with white wine on the right, and a purple FTIR spectral plot overlaid across the center. The plot shows several sharp absorption bands, particularly in the fingerprint region. The background is dark, making the grapes and the spectral plot stand out.

FFTIR spectroscopy is a nondestructive technique that provides structural information on molecular features of a large range of compounds. Its main advantages are speed, a high degree of automation, medium resolution, and cost-effectiveness. Recent improvements in instrumentation together with advances in fiber optics and chemometrics have provided an analytical tool that is suitable for routine qualitative analysis and process control in many industries.

Although FTIR spectroscopy is widely applied in the food industry, acceptance of this technology in the grape and wine industry has been relatively slow and mainly
