

DRAFT ISO 45001

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives). Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents). Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/PC 283, *Occupational health and safety management systems*.

Introduction

0.1 Background

It is estimated by the International Labour Organization (ILO) that there are over 2.3 million deaths every year as a result of work activities, of which close to 2 million are due to ill-health, with the remainder being due to fatal accidents.

An organization is responsible for the health and safety of its workers and that of other persons under its control who are performing work on its behalf, including promoting and protecting their physical and mental health.

The adoption of an occupational health and safety (OH&S) management system can enable an organization to improve its OH&S performance in the enhancement of health and safety at work and to manage its OH&S risks.

NOTE 1 The term "occupational safety and health" ("OSH") has the same meaning as "occupational health and safety" ("OH&S").

NOTE 2 The term "worker" is defined to include both managerial and non-managerial persons
