Pathways To Astronomy 4th Edition :

The Complete Guide to Landscape Astrophotography Michael Shaw, 2017-03-15 The Complete Guide to Landscape Astrophotography is the ultimate manual for anyone looking to create spectacular landscape astrophotography images. By explaining the science of landscape astrophotography in clear and straightforward language, it provides insights into phenomena such as the appearance or absence of the Milky Way, the moon, and constellations. This unique approach, which combines the underlying scientific principles of astronomy with those of photography, will help deepen your understanding and give you the tools you need to fulfill your artistic vision. Key features include a Distinguished Guest Gallery of images from renowned nightscape photographers such as Babak Tafreshi, Bryan Peterson, Alan Dyer, Brenda Tharp, Royce Bair, Wally Pacholka, and David Kingham. The book also covers the twenty-five best landscape astrophotography subjects and how to photograph them, Astronomy 101, building your knowledge of night sky objects and their motion, the Milky Way, moon, Aurora Borealis, Australis, constellations, meteors, and comets. Information on state-of-the-art planning software and apps designed to enable you to capture and enhance your landscape astrophotography. Field guide for creating a detailed plan for your night shoot. Description of the best moon phases for specific types of nightscape images and the best months and times of night to see the Milky Way. How to guide for creating stunning time-lapse videos of the night sky, including Holy Grail transitions from pre-sunset to complete darkness. Four detailed case studies on creating landscape astrophotography images of the Milky Way, full moon, star trails, and constellations.

The Solar System David G. Fisher, Richard R. Erickson, 2010 This book features essential coverage of all major aspects of Earth's solar system, from every feature of the major planets to their satellites, small bodies, interplanetary phenomena, and cosmological context. Designed to meet the needs of both general readers and students, this completely revised and updated edition covers 180 major topics on Earth's solar system as it is understood from the latest perspectives. For this new edition, 58 new topics have been added, and every essay has been thoroughly expanded from the text through bibliographies to bring it up to date in view of the many interplanetary missions that have expanded our knowledge of the solar system, from Pioneer and Voyager through the missions of Galileo, Cassini, Huygens, the Hubble Space Telescope, and the latest Mars probes as of 2009. Scope and coverage: No reference dedicated to the solar system is this detailed or complete and up to date. Coverage is presented in an A-Z format from Archaeoastronomy and Asteroids through Venus, Volcanoes, and White and Black Dwarfs, and is supplemented by more than two hundred photos. For those wishing instant access to essays grouped by planetary system, a Category Index appears in the front of every volume. Essays fall into one or more of the following categories: the Cosmological Context, Earth, the Jovian System, Life in the Solar System, Mars, Mercury, Natural Planetary Satellites, Neptune, Planets and Planetology, the Saturnian System, Scientific Methods, Small Bodies, the Solar System as a Whole, the Stellar Context, the Sun, Uranus, and Venus. Organization and format: Essays range in length from three to seven pages and offer a complete overview of the topic as well as an assessment of knowledge gained, methods

of study or applications Each essay begins with standard ready reference information including the title of the essay the category or categories in which the essay falls and a summary of the importance of the topic and the current state of our knowledge The essay is then broken down into several subsections An Overview section generally the longest subsection in the essay details basic information about the subject and discusses the main facts about the topic Knowledge Gained Methods of Study Applications details how the topic is investigated what scientific knowledge we have accumulated or the uses of the knowledge we have gained Context addresses the topic from the larger perspective of the history of solar system science and its relevance for humankind Further Reading is an annotated selection of the most important print resources for further study Lastly See Also lists cross references to other essays in The Solar System covering related topics Special features the front matter of each volume includes a Complete List of Contents and a Category Index The set is heavily illustrated with over 300 photos At the end of volume three users will find a general bibliography a list of web resources a comprehensive glossary and a full subject index This title contains 3 Volumes 1 056 Pages 180 Essays 58 New See Also Cross References Complete List of Contents Category Index Glossary Bibliography Web Sites and Subject Index *The Journal of the Royal Astronomical Society of Canada ...
