The study of the geometry of structures that arise in a variety of specific natural systems such as chemical physical biological
and geological revealed the existence of a wide range of types of polytopes of the highest dimension that were unknown in
classical geometry At the same time new properties of polytopes were discovered as well as the geometric patterns to which
they obey There is a need to classify these types of polytopes of the highest dimension by listing their properties and
formulating the laws to which they obey *The Classes of Higher Dimensional Polytopes in Chemical Physical and Biological*
