Facts and Fallacies of Software Engineering Robert L. Glass,2002-10-28 The practice of building software is a new kid on the block technology Though it may not seem this way for those who have been in the field for most of their careers in the overall scheme of professions software builders are relative newbies In the short history of the software field a lot of facts have been identified and a lot of fallacies promulgated Those facts and fallacies are what this book is about There s a problem with those facts and as you might imagine those fallacies Many of these fundamentally important facts are learned by a software engineer but over the short lifespan of the software field all too many of them have been forgotten While reading Facts and Fallacies of Software Engineering you may experience moments of Oh yes I had forgotten that alongside some Is that really true thoughts The author of this book doesn t shy away from controversy In fact each of the facts and fallacies is accompanied by a discussion of whatever controversy envelops it You may find yourself agreeing with a lot of the facts and fallacies yet emotionally disturbed by a few of them Whether you agree or disagree you will learn why the author has been called the premier curmudgeon of software practice These facts and fallacies are fundamental to the software building field forget or neglect them at your peril

Making Software Andy Oram,Greg Wilson,2010-10-14 Many claims are made about how certain tools technologies and practices improve software development But which claims are verifiable and which are merely wishful thinking In this book leading thinkers such as Steve McConnell Barry Boehm and Barbara Kitchenham offer essays that uncover the truth and unmask myths commonly held among the software development community Their insights may surprise you Are some programmers really ten times more productive than others Does writing tests first help you develop better code faster Can code metrics predict the number of bugs in a piece of software Do design patterns actually make better software What effect does personality have on pair programming What matters more how far apart people are geographically or how far apart they are in the org chart Contributors include Jorge Aranda Tom Ball Victor R Basili Andrew Begel Christian Bird Barry Boehm Marcelo Cataldo Steven Clarke Jason Cohen Robert DeLine Madeline Diep Hakan Erdogmus Michael Godfrey Mark Guzdial Jo E Hannay Ahmed E Hassan Israel Herraiz Kim Sebastian Herzig Cory Kapsler Barbara Kitchenham Andrew Ko Lucas Layman Steve McConnell Tim Menzies Gail Murphy Nachi
