An Investigation of Errors made by Polish Learners of English** Tom Keller, 2016-04-13 Seminar paper from the year 2010 in the subject English Language and Literature Studies Linguistics grade 3.0 Technical University of Braunschweig Englishes Seminar course Second Language Acquisition language English abstract In this paper I will investigate several language productions from Polish learners using the English language and try to uncover their errors Using Error Analysis I will describe and explain the reasons for the error production An interesting question will be whether the Polish speakers may have typical errors which could be related to their native language Due to the numerous kinds of errors it will be necessary to classify them and to relate them to certain reasons Furthermore there exists a difference between an error and a mistake Its importance will be discussed later on Even though Error Analysis initially offers helpful opportunities to investigate error production in a structured way it has several disadvantages which were criticized in past decades In the end the conclusion will give an overview of the contents and summary the handled topics During the last several decades linguists have investigated the way of acquiring a second language Learners have several ways of acquiring a language and the field of second language acquisition SLA tries to uncover and improve them When people try to learn a foreign language they produce a considerable amount of errors These errors have always been made in the learning process and will never cease to occur During the complex investigations of second language acquisition linguists have focused on Error Analysis EA with its aim to take a deeper look on learner production Around the late 60 s this particular analysis was established with an approach of Pit Corder This system shows that errors should be investigated to understand and also improve the linguists attempts of learning a second language Typical questions which arise are why learners make errors and what reasons do they have Before Pit Corder linguists used the Contrastive Analysis CA which examines certain errors and refers to a particular connection between the first and the second language The differences between these two types of analysis will be examined in detail in the following chapter Several steps are needed to analyze

*Analysis in New Language Acquisition* Andrea Letzel, 2016-11-17 Studienarbeit aus dem Jahr 2010 im Fachbereich Anglistik Linguistik Note 1,3 Johannes Gutenberg Universität Mainz Sprache Deutsch Abstract Error Analysis used in second language analysis studies the errors learners make in speech and writing. It also studies the different types of errors and why they were made. In this term paper two different types of learners will be considered who perform spontaneously with the help of a picture story. There will be a special focus on the differences and similarities of their errors. There are various possibilities how samples of learner language can be influenced. Firstly, the learner and his proficiency level have to be described and it is important if he speaks or learns other languages irrespective of the MT and the target language that is considered in the analysis. The way of instruction plays also an important role because instructed language learning provides a different error background as if the learner tries to learn the language naturalistically. The second part that has to be described is the language itself. The medium can either be oral or written. Generally, the oral production consists of a more colloquial English for the simple reason that the learner has not as much time to think about formulation than in written speech. Therefore, the Genre and the content of the language production is. Error Evaluation and Error correction are additional parts that have not to be included in every Error Analysis. According to the dictionary of Linguistics, the error analysis is subdivided and classified in modality, levels of linguistic description, form type and cause. Understanding and Interpreting Data on the Learning of English Tenses and Verb Forms Jason Miin-Hwa Lim, 2021-01-08 Guiding learners to acquire sufficient knowledge of grammar constitutes an interesting domain in the field of teaching English as a second language. This research-based resource book focuses on the learning of English tenses and verbal categories which forms a huge and fascinating component of English grammar that merits attention in teachers' attempts to improve their students' English proficiency. Inspired by concepts relating to explicit learning, consciousness raising, contrastive analysis and error analysis, the author used a wealth of data derived from a set of elicitation procedures to reveal the linguistic interference encountered by second language learners. Arguing for the need to conceptualise grammatical rules positively, this inquiry focuses on studying learners' wide-ranging responses to a large number of items designed to explore linguistic interference in the learning of English verb forms in eight major categories. The findings, explanations and illustration-based recommendations provided in this volume will give trainee teachers, instructors and researchers deeper insights into how strategies can be aptly employed to enhance learners' performance in using English verb forms and related grammatical categories which constitute a key dimension in the learning and teaching of English as a second language. **Non-native Speech in English Literature** Maria Sutor, 2015-04-17 Foreign accents in fiction are a common stylistic instrument of marking a character as the Other and conveying national stereotypes in literature. This study investigates in a qualitative analysis the linguistic characteristics of non-native fictional speech with a specific focus on the English Renaissance, the Victorian Age and the 20th century war decades. After examining the concept of national identity and the image of the foreigner in these eras, the study undertakes an

in depth linguistic analysis of a literary corpus of drama and prose Recurring patterns in non native fictional speech are uncovered and set into relation with the socio cultural background of the respective work which leads to intriguing findings about the changing image of the foreigner and the phenomenon of linguistic stereotyping in English literature *Discourse Markers Across Languages* Dirk Siepmann,2005 This book offers a corpus based comparative study of an almost entirely unexplored set of multi word lexical items serving pragmatic or text structuring functions Part One provides a descriptive account of multi word discourse markers in written English French and German focussing on dicussion of interlingual equivalence Part Two examines the use of multi word markers by non native speakers of English and discusses lexicographical and pedagogical implications *Error Analysis of English Essays written by Students of Southern Punjab* Asad Javaid,2018-05-14 Master s Thesis from the year 2017 in the subject English Language and Literature Studies Linguistics grade 1 5 National University of Modern Languages Islamabad Institute of English Studies course English Linguistics language English abstract It is a descriptive study based on the analysis of essays written by male and female students in two different schools of Multan Southern Punjab In the present research the researcher has collected data from two different schools i e one government and one private The participants for the present research are the students boys and girls of secondary level The data for the present research has been collected from hundred students in the form of essays on My Favourite Personality and My Autobiography The researcher has employed Pit Corder s 1967 model for the analysis of data The data has been analysed and the researcher has categorized errors committed by the students into different types i e verb tense subject verb disagreement inappropriate use of article wrong use of preposition etc The data is also represented in the form of pie chart Furthermore the frequency of occurrence of different types of errors is also discussed along with some of the possible causes of errors The findings of the present research highlight that students of government school commit more errors than that of private Moreover the findings also suggest that students commit errors not only due to their mother tongue influence but because of other reasons which are explained in the analysis section These findings are valuable for academia to devise policies accordingly **Similar Lexical Forms in Interlanguage** Batia Laufer-Dvorkin,1991 A Linguistic Study of Errors R.
