Molecular diagnostic methods for bacteria and fungi detection Laura

Cerqueira, Carina Almeida, 2024-06-12 Microorganisms like bacteria and fungi are ubiquitous worldwide and can have different roles in human's lives Some will bring beneficial effects which are exploited and used in industrial and agricultural sectors Contrariwise some are responsible for several life threatening diseases Microbial analysis surveillance and research is therefore crucial Until recently the classical culturing methods were widely used to study bacteria and fungi However these methods although considered the gold standard are becoming now obsolete since they tend to be time consuming have low sensitivity and are unable to detect some cellular morphological states as the viable but non culturable VBNC state leading to false negative results Moving away from the classical methods microbial detection is now evolving to new effective and rapid diagnostics
