web linear feedback shift registers lfsrs have nice statistical properties and a well developed theory they are also cheap and fast on the other hand it is clear that every periodic sequence can be generated by a linear feedback shift register simply take an lfsr of the same size as the period it is therefore natural to use the length

web oct 28 2019 the algorithm couldn't be entirely linear because it would get stuck it would produce nothing but zeros forevermore once it encountered an input sequence of all zeros so technically a lfsr is an nearly always linear feedback shift register it's linear for  $2^n - 2$  inputs and nonlinear for 2 special inputs a lfsr is more general

web in computing a linear feedback shift register lfsr is a shift register whose input bit is a linear function of its previous state the most commonly used linear function of single bits is exclusive or xor thus an lfsr is most often a shift register whose input bit is driven by the xor of some bits of the overall shift register value
