*Green Biorefinery Solutions* Sanjiv K. Soni, Raman Soni, 2025-07-26 This book delves into the innovative concept of biorefineries as a sustainable approach for managing biodegradable waste and producing valuable resources. It highlights the pressing need to address environmental challenges such as waste accumulation and resource depletion while meeting the increasing demand for renewable energy and bio-based products. The book introduces the concept of biorefineries which are analogous to conventional oil refineries but focus on converting biomass and biodegradable waste into a range of high value products. These products include biofuels, biochemicals, bioplastics, biofertilizers and other materials that can replace fossil derived equivalents. The author explores various technological pathways and processes involved in efficiently transforming different types of biodegradable waste such as agricultural residues, food waste and organic byproducts into usable resources. Readers are guided through the principles of biorefinery design, integration of various unit operations and the optimization of conversion processes to achieve maximum resource utilization and minimal environmental impact. The book emphasizes the importance of circular economy concepts where waste is considered a valuable input rather than a burden. It also discusses the economic, social and environmental benefits of adopting biorefinery solutions in different sectors from agriculture to industry. The book is a valuable resource for researchers, policymakers, industry professionals and students interested in exploring innovative approaches to waste management, resource recovery and the transition towards a more sustainable and circular bioeconomy. By highlighting the transformative potential of biorefineries, the book contributes to the ongoing dialogue on creating a more environmentally conscious and resource efficient future.

**Biotechnological Solutions for a Sustainable Future** Naveen Kumar Arora, Jitendra Mishra, 2026-01-01 This book explores advanced biotechnologies addressing environmental and industrial challenges. It bridges the gap between scientific innovation and practical implementation, showcasing how microbial, nano biotechnological and biochemical advancements can drive sustainability across agriculture, industry and environmental remediation. This book opens with a focus on soil health, highlighting biochar based fertilizers and microbial interventions to rejuvenate degraded soils, enhance crop productivity and reduce chemical dependency. It then transitions to pollution control, featuring microbial biosurfactants and CRISPR engineered microbes for pollutant cleanup, nanotechnology driven wastewater treatment and innovative strategies for radioactive waste management. Industrial applications are equally emphasized with chapters on antimicrobial food packaging to combat spoilage and microbial carotenoids for pharmaceutical and nutraceutical industries. This volume of *Microorganisms for Sustainability* book series is a vital resource for researchers, policymakers and practitioners. It underscores biotechnology's role in achieving the United Nations Sustainable Development Goals (SDGs) particularly in climate action (SDG 13), clean water and sanitation (SDG 6) and responsible consumption and production (SDG 12). By addressing both traditional and emerging fields such as nano biotechnology and microbial engineering, the book fosters interdisciplinary collaboration and inspires scalable, eco-conscious

solutions for a resource constrained world *Rising Threats in Expert Applications and Solutions* Vijay Singh Rathore, Nilanjan Dey, Vincenzo Piuri, Rosalina Babo, Zdzislaw Polkowski, João Manuel R. S. Tavares, 2020-10-01 This book presents high quality peer reviewed papers from the FICR International Conference on Rising Threats in Expert Applications and Solutions 2020 held at IIS University Jaipur Rajasthan India on January 17 19 2020 Featuring innovative ideas from researchers academics industry professionals and students the book covers a variety of topics including expert applications and artificial intelligence machine learning advanced web technologies like IoT big data and cloud computing in expert applications information and cybersecurity threats and solutions multimedia applications in forensics security and intelligence advances in app development management practices for expert applications and social and ethical aspects of expert applications in applied sciences

**Powering Future: Clean Energy Solutions for a Sustainable Planet** Akhilesh Kumar Yadav, 2025-06-23 This edited volume explores the world of clean energy diving into technological innovations and advancements This book discusses the complexities of our energy landscape providing comprehensive insights into renewable technologies and their environmental impacts The need for renewable energy stems from various environmental economic and social concerns The renewable energy sources such as solar wind hydro and geothermal power offer sustainable alternatives to finite fossil fuels They reduce greenhouse gas emissions mitigate climate change enhance energy security by diversifying the energy mix and diminish dependence on imported fuels thus decreasing geopolitical risks Transitioning to clean energy production technologies also reduces air and water pollution which is crucial for a sustainable future ensuring environmental protection economic prosperity and social equity for present and future generations Some of the key topics covered are solar energy utilization efficiency and life cycle analysis of solar panels nature based energy generation sustainability through biomass and biogas nuclear energy geothermal energy among others This book is an engaging read for students academics researchers policymakers and climate enthusiasts offering valuable information to assist us in making informed decisions for a cleaner greener future

**Recent Advances in Material, Manufacturing, and Machine Learning** Bjorn Schuller, Rajeev Gupta, Rakesh Mote, Abhishek Sharma, J.P. Giri, R.B. Chadge, 2024-06-17 The main aim of the 2nd international conference on recent advances in materials manufacturing and machine learning processes 2023 RAMMML 23 is to bring together all interested academic researchers scientists engineers and technocrats and provide a platform for continuous improvement of manufacturing machine learning design and materials engineering research RAMMML 2023 received an overwhelming response with more than 530 full paper submissions After due and careful scrutiny about 120 of them have been selected for presentation The papers submitted have been reviewed by experts from renowned institutions and subsequently the authors have revised the papers duly incorporating the suggestions of the reviewers This has led to significant improvement in the quality of the contributions Taylor Francis publications CRC Press have agreed to publish the selected proceedings of the conference in their book series of Advances in Mechanical
