5G System Design Patrick Marsch, Ömer Bulakci, Olav Queseth, Mauro Boldi, 2018-03-28
This book provides a comprehensive overview of the latest research and standardization progress towards the 5th generation 5G of mobile communications technology and beyond. It covers a wide range of topics from 5G use cases and their requirements to spectrum 5G end-to-end E2E system architecture including core network CN, transport network TN, and radio access network RAN architecture, network slicing, security, and network management. It further dives into the detailed functional design and the evaluation of different 5G concepts and provides details on planned trials and pre-commercial deployments across the globe. While the book naturally captures the latest agreements in 3rd Generation Partnership Project 3GPP New Radio NR Release 15, it goes significantly beyond this by describing the likely developments towards the final 5G system that will ultimately utilize a wide range of spectrum bands, address all envisioned 5G use cases, and meet or exceed the International Mobile Telecommunications IMT requirements for the year 2020 and beyond. IMT 2020 5G System Design: Architectural and Functional Considerations and Long Term Research is based on the knowledge and consensus from 158 leading researchers and standardization experts from 54 companies or institutes around the globe, representing key mobile network operators, network vendors, academic institutions, and regional bodies for 5G. Different from earlier books on 5G, it does not focus on single 5G technology components but describes the full 5G system design from E2E architecture to detailed functional design, including details on 5G performance, implementation, and roll-out.

Measurement Methodology and Tools Lluís Fàbrega, Pere Vilà, Davide Careglio, Dimitri Papadimitriou, 2013-09-13
This book constitutes the outcome of the Workshop on Measurement and Measurement Tools, which was held as part of the Future Internet Research Experimentation FIRE initiative during the Future Internet Assembly conference FIA in May 2012. The 10 contributions included in this volume are invited extended versions of the presentations at the workshop. The book closes with a summary and conclusions of the findings in these papers.
