Dynamic Strategic Analysis Sebastian Raisch, 2012-12-06 Today many business environments are characterized by frequent changes that result in a higher market dynamism and complexity Global media industries are an up to date example of this development a fast growth period was followed by a rapid downturn Media companies wrote off a colossal US 120 billion from their balance sheets in 2002 mostly as a result of growth strategies failure It seems that despite popular belief growth or market share by itself is less than ever before a guarantor of success Sebastian Raisch decided to analyze various strategies in order to gain a better understanding of the determinants of successful firm performance When he decided to go on a research journey into the elements and dynamics of strategic thinking and firm performance he brought along all the ingredients necessary for such a challenging project he had experience gained through exhaustive consulting work excellent knowledge of management theories and as a result of his studies and activities as a research assistant specific knowledge of strategic management His research objectives were furthermore clearly defined and thanks to a meticulously planned and well organized project as well as his enthusiasm for the topic he had ready access to an empirical field

Water Policy in Canada Mohammed H. Dore, 2015-03-11 This book deals with the water policy and management in Canada It discusses various problems and risks in the fresh and drinking water supply in the second largest country in the world Mohammed Dore argues that water is underpriced and used wastefully in Canada In selected case studies he illustrates the major threats from human activity to Canadian freshwaters and drinking water resources including manufacturing mining oil sands production animal farming and agricultural use Selected case studies include reviews of even dramatic incidences e.g. the Walkerton tragedy of 2000 when 7 people were killed and 200 went onto permanent dialysis treatment because of water contamination with harmful pathogens The book warns that wastewater treatment standards are often not sufficient so that many drinking water resources are in peril of wastewater contamination As most of the water resources are provincial responsibility the book discusses the water management policies in the different provinces separately Through a detailed discussion and statistical analyses it can define water policy and management lessons that emerge from the investigated case studies It ends by contrasting water policy and practice in Canada with the practice in some European countries

Forecasting and Hedging in the Foreign Exchange Markets Christian Ullrich,2009-05-30 Historical and recent developments at international financial markets show that it is easy to lose money while it is difficult to predict future developments and optimize decision making towards maximizing returns and minimizing risk One of the reasons of our inability to make reliable predictions and to make optimal decisions is the growing complexity of the global economy This is especially true for the foreign exchange market FX market which is considered as one of the largest and most liquid financial markets Its degree of efficiency and its complexity is one of the starting points of this volume From the high complexity of the FX market Christian Ullrich deduces the necessity to use tools from machine learning and artificial intelligence e.g support vector machines and to combine such methods with sophisticated financial modeling techniques The suitability of this combination of ideas is demonstrated by an empirical study and by simulation I am pleased to introduce this book to its audience hoping that it will provide the reader with interesting ideas to support the understanding of FX markets and to help to improve risk management in difficult times Moreover I hope that its publication will stimulate further research to contribute to the solution of the many open questions in this area
