commerce *Language Transfer in Language Learning* Susan M. Gass, Larry Selinker, 1983 [Language Transfer in Language Learning](#) Susan M. Gass, Larry Selinker, 1992 [The Usage of English Loanwords in German-Language Rap from 1990 to 2020](#) Jožef Kolarič, 2026-03-06 The book makes use of a methodology based on sociolinguistics corpora and critical discourse analysis to look into language use in German language rap. First it examines how the use of English loanwords has changed from 1990 to 2020 in rap made in Germany. This is done by observing and analysing language use of fifteen rappers rap groups throughout the course of their discographies. Normative use of English loanwords has been observed in the corpus. The analysis of rap made in Germany is followed by a smaller sample analysis of rappers from Austria and Switzerland. The analysed timeframe was the same as for Germany so that normative loanword use by specific rappers can be observed and compared with the results based on German rappers language use. Finally results from all three countries are compared with the existing studies of English loanword use in different media and the research with which they share sociolinguistic variables. *Georgetown University Round Table on Languages and Linguistics (GURT) 1996: Linguistics, Language Acquisition, and Language Variation* James E. Alatis, 1996-08-15 This volume examines linguistics language acquisition and language variation emphasizing their implications for teacher education and language education. A majority of the essays consider issues in second language acquisition dealing specifically with learners and instructors or concentrating on the larger social and societal context in which learning and acquisition occur. Topics highlighted include the current and often controversial debate over bilingual education language variation and the past present and future role of linguistics in language pedagogy. [Developmental and Clinical Pragmatics](#) Klaus P. Schneider, Elly Ifantidou, 2020-08-24 This handbook provides a comprehensive and up to date survey of a wide range of developmental and clinical issues in pragmatics. Principally the contributions to this volume deal with pragmatic competence in a native language in a second or foreign language and in a selection of language disorders. The topics which are covered explore questions of production and comprehension on the utterance and discourse level. Topics addressed concern the acquisition and learning teaching and testing assessment and treatment of various aspects of pragmatic ability knowledge and use. These include for example the acquisition and development of speech acts implicatures irony story telling and interactional competence. Phenomena such as pragmatic awareness and pragmatic transfer are also addressed. The disorders considered include clinical conditions pertaining to children and to adults. Specifically these are among others autism spectrum disorders Down syndrome and Alzheimer's disease. *Information Highlighting in Advanced Learner English* Marcus Callies, 2009 This book presents the first detailed and comprehensive study of information highlighting in advanced learner language echoing the increasing interest in questions of near native competence in SLA research and contributing to the description of advanced interlanguages. It examines the production and comprehension of specific means of information highlighting in English by native speakers and German learners of English as a foreign language presenting triangulated experimental and learner

corpus data as corroborating evidence The study focuses on learners use of discourse pragmatically motivated variations of the basic word order such as inversion preposing and it and wh clefts an underexplored field in SLA research to date The book also provides a critical re assessment of the study of pragmatics within SLA It has largely been neglected to date that L2 pragmatic knowledge includes more than the sociopragmatic and pragmlinguistic abilities for understanding and performing speech acts Thus the book argues for an extension of the scope of inquiry in interlanguage pragmatics beyond the cross cultural investigation of speech acts It also discusses pedagogical implications for foreign language teaching and will be of interest to applied linguists and SLA researchers language teachers and curriculum designers
