Nuclear Science Abstracts, 1970 NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976 pre dating the prestigious INIS database which began in 1970 NSA existed as a printed product Volumes 1 33 initially created by DOE s predecessor the U S Atomic Energy Commission AEC NSA includes citations to scientific and technical reports from the AEC the U S Energy Research and Development Administration and its contractors plus other agencies and international organizations universities and industrial and research organizations References to books conference proceedings papers patents dissertations engineering drawings and journal articles from worldwide sources are also included Abstracts and full text are provided if available [Sound & Vibration](#), 2005

Scientific and Technical Aerospace Reports, 1970 *Handbook of Technical Diagnostics* Horst Czichos, 2013-01-11 This book presents concepts methods and techniques to examine symptoms of faults and failures of structures systems and components and to monitor functional performance and structural integrity The book is organized in five parts Part A introduces the scope and application of technical diagnostics and gives a comprehensive overview of the physics of failure Part B presents all relevant methods and techniques for diagnostics and monitoring from stress strain vibration analysis nondestructive evaluation thermography and industrial radiology to computed tomography and subsurface microstructural analysis Part C covers the principles and concepts of technical failure analysis illustrates case studies and outlines machinery diagnostics with an emphasis on tribological systems Part D describes the application of structural health monitoring and performance control to plants and the technical infrastructure including buildings bridges pipelines electric power stations offshore wind structures and railway systems And finally Part E is an excursion on diagnostics in arts and culture The book integrates knowledge of basic sciences and engineering disciplines with contributions from research institutions academe and industry written by internationally known experts from various parts of the world including Europe Canada India Japan and USA *Evaluation of CTCLS Series Traffic Signal Load Switches in the Field* Helmut T. Zwahlen, 2003 The purpose of this study was to evaluate the extended traffic signal light bulb longevity claims made by CLS for their CTCLS series load switches by testing in the field against conventional load switches in five different states except Minnesota In each state approximately 144 signalized intersections containing 512 load switches and 3456 bulbs were installed for the study half using CTCLS load switches and half conventional load switches The states involved were Ohio Mississippi the state and the city of Jackson Michigan Wisconsin Minnesota where no load switches or bulbs were installed and Iowa City of Waterloo Four different major brands of bulbs were evaluated in the study GE Real GE Phillips Sylvania and Duro test with each brand assigned to a particular state two states used Sylvania bulbs Intersections used in the study were to be monitored and maintained for two years and failed bulbs and load switches were tagged and returned to the study subcontractor The Operator Performance Laboratory at the University of Iowa for cataloging and analysis periodically during that time The CLS

claim that their CTCLS series load switches extended bulb life and reduced maintenance costs could not be investigated since ODOT decided to remove the CTCLS load switches due to safety and liability concerns after several of the switches gave dual indications or other malfunctions The study was then modified to study all the bulbs using only conventional load switches 3456 bulbs per state In addition the Duro test company went bankrupt after the test started Overall the bulb life portion of the study produced little useful data In all cases the states and cities tagged and returned at most a fraction of the failed bulbs It appears that the extra work caused by the study may have been asking too much of already busy maintenance personnel Thus it seems that studies that rely on extra efforts by state personnel over a long period of time are at best difficult to carry out The two bulb brands GE Real Ohio and Sylvania Jackson MS for which reasonably complete data were made available from internal department records would be unsuitable for use in Ohio both exceeding the ODOT 2% failure criterion for the first year A group relamping spreadsheet was created and evaluated using Ohio District 4 as a test case for a limited sensitivity analysis A relatively easy to use Excel spreadsheet was devised to compute the costs of group relamping as a function of relamping interval The model shows a shallow minimum region at about 10 months providing a minimized annual cost of

Mathematical Modelling and Numerical Analysis of Size-Dependent Structural Members in Temperature Fields Jan Awrejcewicz, Anton V. Krysko, Maxim V. Zhigalov, Vadim A. Krysko, 2020-10-08 This book is devoted to researchers and teachers as well as graduate students undergraduates and bachelors in engineering mechanics nano mechanics nanomaterials nanostructures and applied mathematics It presents a collection of the latest developments in the field of nonlinear chaotic dynamics of mass distributed parameter nanomechanical structures providing a rigorous and comprehensive study of modeling nonlinear phenomena It is written in a unique pedagogical style particularly suitable for independent study and self education In addition the book achieves a good balance between Western and Eastern extensive studies of the mathematical problems of nonlinear vibrations of structural members
