Mullins, 1975 Biochemistry Terry Brown, 2016-09-22 Biochemistry is a major new textbook designed and created specifically for briefer courses in the subject. Written by Prof Terry Brown of the University of Manchester author of Genomes and Gene Cloning the book provides the necessary detail and rigour expected for these courses but without the extraneous material found in the larger textbooks. With an increasing number of students taking a short course in biochemistry there is a growing need for a book that covers the subject concisely and succinctly. Biochemistry has been designed from the outset for these shorter courses it is not a cut down version of one of the larger books that dominate the market. Although it is shorter there is no compromise in content style and coverage. The book is attractively designed in full colour throughout with all the pedagogical features expected in a major textbook. It covers what students should be expected to know and is written in the clear and accurate writing style for which Terry Brown is widely lauded.
