Security, Data Analytics, and Energy-Aware Solutions in the IoT Hei, Xiali, 2021-12-24 Internet of things networks have shown promising outcomes in the provisioning of potentially critical services such as safety applications healthcare and manufacturing However there are many challenges related to the security data analysis and limited resources of the performed operations that require further investigation Additional research is necessary to address the concerns and doubts of researchers and industry professionals in the Internet of Things Security Data Analytics and Energy Aware Solutions in the IoT reports novel methodologies theories technologies and solutions for security and data analytics techniques and energy aware solutions for the Internet of Things Covering a wide range of topics such as laser attacks and personal data it is ideal for academicians industry professionals researchers instructors and students *Aspects of Personal Privacy in*

Communications - Problems, Technology and Solutions Geir M. Koen, Vladimir a. Oleshchuk, 2025-01-13 The modern society is rapidly becoming a fully digital society This has many benefits but unfortunately it also means that personal privacy is threatened The threat does not so much come from a 1984 style Big Brother but rather from a set of smaller big brothers The small big brothers are companies that we interact with they are public services and institutions Many of these little big brothers are indeed also being invited to our private data by ourselves Privacy as a subject can be problematic At the extreme it is personal freedom against safety and security We shall not take a political stand on personal privacy and what level of personal freedom and privacy is the correct one *Aspects of Personal Privacy in Communications* is mostly about understanding what privacy is and some of the technologies may help us to regain a bit of privacy We discuss what privacy is about what the different aspects of privacy may be and why privacy needs to be there by default There are boundaries between personal privacy and societal requirements and inevitably society will set limits to our privacy Lawful Interception etc There are technologies that are specifically designed to help us regain some digital privacy These are commonly known as Privacy Enhancing Technologies PETs We investigate some these PETs including MIX networks Onion Routing and various privacy preserving methods Other aspects include identity and location privacy in cellular systems privacy in RFID Internet of Things IoT and sensor networks amongst others Some aspects of cloud systems are also covered **Innovative Security**
