**Antimalarial Agents** Graham L. Patrick, 2020-05-30 *Antimalarial Agents Design and Mechanism of Action* seeks to support medicinal chemists in their work toward antimalarial solutions providing practical guidance on past and current developments and highlighting promising leads for the future. Malaria is a deadly disease which threatens half of the world's population. Advances over several decades have seen vast improvements in the effectiveness of both preventative measures and treatments but the rapid adaptability of the disease means that the ongoing search for improved and novel antimalarial drugs is essential. Beginning with a historical overview of malaria and antimalarial research this book goes on to describe the biological aspects of malaria highlighting the lifecycle of the parasite responsible for malaria the problem of resistance genetic mapping of the parasite's genome established drug targets and potential drug targets for the future. This sets the scene for the following chapters which provide a detailed study of the medicinal chemistry of antimalarial agents with a focus on the design of antimalarial drugs. Drawing on the knowledge of its experienced authors and coupling historic research with current findings to provide a full picture of both past and current milestones. *Antimalarial Agents Design and Mechanism of Action* is a comprehensive yet accessible guide for all those involved in the design development and administration of antimalarial drugs including student academic researchers medicinal chemists malaria researchers and pharmaceutical scientists. Consolidates both past and current developments in the discovery and design of antimalarial drugs. Presents content in a style that is both thorough and engaging providing a supportive and guiding reference to students and researchers from interdisciplinary backgrounds. Highlights drug targets currently considered to be the most promising for future therapies and the classes of compounds that are currently being studied and perfected. **New Scientist**, 1995
