Networks '98: Ieee Sicon'98: Proceedings Of The 6th Ieee Singapore International Conference Akkihebbal L Ananda, Hung Keng Pung, Weiguo Wang, 1998-06-22 This book is aimed at scientists, technologists, engineers and undergraduate and graduate students involved in analytical and process biochemistry and biotechnology. It reviews the potentialities of light emitting reaction associated with the sensor approach. The book introduces the concepts of sensors and biosensors and places bio and chemi luminescent sensors in the general context of biosensors. It then briefly describes luminescence phenomena and provides some basic knowledge necessary for understanding and exploiting light emitting reactions. These luminescence reactions important from an analytical standpoint are described. Also the applications of bio and chemi luminescence which make use of immobilized reagents are explained. Finally there is discussion of bio and chemi luminescent sensors most of them including fiber optics. Parallel and Distributed Processing and Applications Jiannong Cao, Laurence T. Welcome to the proceedings of the 2nd International Symposium on Parallel and Distributed Processing and Applications ISPA2004 which was held in Hong Kong, China, 13-15 December 2004. With the advance of computer networks and hardware technology, parallel and distributed processing has become a key technology which plays an important part in determining future research and development activities in many academic and industrial branches. It provides a means to solve computationally intensive problems by improving processing speed. It is also the only approach to building highly reliable and inherently distributed applications. ISPA2004 provided a forum for scientists and engineers in academia and industry to exchange and discuss their experiences, new ideas, research results and applications about all aspects of parallel and distributed computing. There was a very large number of paper submissions, 361 from 26 countries and regions including not only Asia and the Pacific but also Europe and North America. All submissions were reviewed by at least three program or technical committee members or external reviewers. It was extremely difficult to select the presentations for the conference because there were so many excellent and interesting submissions. In order to allocate as many papers as possible and keep the high quality of the conference, we finally decided to accept 78 regular papers and 38 short papers for oral technical presentations. We believe that all of these papers and topics not only provide novel ideas, new results, work in progress and state of the art techniques in this field but also stimulate the future research activities in the area of parallel and distributed computing with applications. **Smart Technologies in Healthcare Management** Nidhi Sindhwani, Sarvesh Tanwar, Ajay Rana, Ramani Kannan, 2024-06-28 Offering a holistic view of the pioneering trends and innovations in smart healthcare management, this book focuses on the methodologies, frameworks, design issues, tools, architectures and technologies necessary to develop and understand intelligent healthcare systems and emerging applications in the present era. *Smart Technologies in Healthcare Management: Pioneering Trends and Applications* provides
