Hudi Setyobakti,Muh. Barid Nizarudin Wajdi,Tarjo,Edy Sujana,2024-01-11 This is an open access book Welcome to the 7th Indonesian Conference focused on the theme of SDGs Transformation through the Creative Economy Encouraging Innovation and Sustainability This edition aims to

explore the intersection between the Sustainable Development Goals (SDGs) and the creative economy emphasizing the importance of fostering innovation and sustainability. The conference provides a platform for academics, researchers, policymakers, industry professionals, and stakeholders to gather and exchange knowledge, ideas, and experiences regarding the transformative power of the creative economy in achieving the SDGs. By examining the dynamic relationship between creativity, innovation, and sustainable development, this edition aims to generate valuable insights and practical solutions to address the pressing global challenges we face today. Throughout this conference, participants will have the opportunity to delve into various topics related to the creative economy and its potential to contribute to the SDGs. We will explore how creative industries can drive economic growth, promote social inclusivity, preserve cultural heritage, and protect the environment. Moreover, we will investigate innovative approaches, best practices, and emerging trends that can enhance the creative economy's impact on sustainable development. By gathering experts and practitioners from diverse fields, we aim to foster interdisciplinary dialogue and collaboration, ultimately inspiring new ideas, strategies, and policies that can foster a more sustainable and inclusive future. Together, we can harness the power of the creative economy to propel transformative change, aligning our efforts with the global agenda of achieving the SDGs. We extend our heartfelt appreciation to all participants, sponsors, and organizers for their commitment to advancing the discourse on the creative economy and sustainable development. Let us embark on this journey of exploration, innovation, and collaboration as we work towards a better and more sustainable future for all.

**Construction Dispute Research** Sai On Cheung, 2014-07-08

There are three specific purposes of Construction Dispute Research. First, this volume aims to summarise studies on construction dispute. Second, apart from the theoretical constructs, where appropriate empirical tests are also included. This approach serves to go beyond the commonly used anecdotal approach for the subject matters. Third, it is the sincere hope of the authors that this book will help shaping research agenda of construction dispute. The studies are mostly framed from a management perspective, drawing on methods and concepts in contract law, economics, psychology, and management science. The book has twenty chapters that are arranged in four parts covering conceptualisation, avoidance, negotiation, and mediation. Part 1 is devoted for dispute conceptualisation. A building is only as strong as its foundation. Thus, it is no better start to study construction dispute by conceptualisation. The theme of Part 2 is dispute avoidance. The conventional wisdom of prevention is better than cure seems can be applied to all problems. As far as construction dispute is concerned, equitable risk allocation and trust are the two most commonly accepted avoidance strategies. Part 3 focuses on negotiation, that is the gateway to resolution, as almost all disputes are negotiated first before the service of other mechanisms. Negotiation is sometimes described as an art because settlement may not be obtained solely from legal and rational approaches. Part 3 discusses the behavioral dimensions of construction dispute negotiation. Part 4 deals with Mediation, a form of assisted negotiation. Specially, the skill of the mediators in facilitating settlement, the interrelationships among dispute sources, mediator tactics,

and mediation outcomes are explored The studies presented in Construction Dispute Research collectively demonstrate holistic approach in dispute management Each chapter can be read as a study on its own Practitioners will find the book a handy reference in dispute management and resolution Students would find the book useful in explaining in details the causes of dispute the processes to resolve them The research design and empirical approaches are particularly useful to students in construction management architectural surveying and civil engineering programs
