Modern Science Peter J. Bowler,Iwan Rhys Morus,2010-02-24 The development of science according to respected scholars
Peter J Bowler and Iwan Rhys Morus expands our knowledge and control of the world in ways that affect but are also affected
by society and culture In Making Modern Science a text designed for introductory college courses in the history of science
and as a single volume introduction for the general reader Bowler and Morus explore both the history of science itself and its
influence on modern thought Opening with an introduction that explains developments in the history of science over the last
three decades and the controversies these initiatives have engendered the book then proceeds in two parts The first section
considers key episodes in the development of modern science including the Scientific Revolution and individual
accomplishments in geology physics and biology The second section is an analysis of the most important themes stemming
from the social relations of science the discoveries that force society to rethink its religious moral or philosophical values

Making Modern Science thus chronicles all major developments in scientific thinking from the revolutionary ideas of the seventeenth century to the contemporary issues of evolutionism genetics nuclear physics and modern cosmology Written by seasoned historians this book will encourage students to see the history of science not as a series of names and dates but as an interconnected and complex web of relationships between science and modern society The first survey of its kind Making Modern Science is a much needed and accessible introduction to the history of science engagingly written for undergraduates and curious readers alike
